NTA - Indonesia

Aggregate Level, 2010

A Framework of NTA Flow Account

NTA Flow Account, stylized, value of aggregate annual flows

| | Children | Working age | Elderly | Total economy | Rest of the world | Total |
|------------------------------------|----------|----------------|---------|------------------|----------------------|-------|
| Panel A. Economic life cyle | | | | | | |
| Life cyle deficit | 20 | -15 | 10 | 15 | | |
| Consumption | 20 | 70 | 10 | 100 | 2 | 102 |
| Labour income | 0 | 85 | 0 | 85 | 1 | 86 |
| Age reallocations | 20 | -15 | 10 | 15 | | |
| Panel B. Public age reallocations | | | | | | |
| Public age reallocations | 5 | -8 | 5 | 2 | | |
| Public transfers | 5 | -11 | 5 | -1 | 1 | 0 |
| Public transfer inflows | 5 | 0 | 5 | 10 | 2 | 12 |
| LESS: Public transfer outflows | 0 | 11 | 0 | 11 | 1 | 12 |
| Public asset-based reallocations | 0 | 3 | 0 | 3 | 0 | 3 |
| Public asset income | 0 | -4 | 0 | -4 | 0 | -4 |
| LESS: Public saving | 0 | -7 | 0 | -7 | 0 | -7 |
| Panel C. Private age reallocations | | | | | | |
| Private age reallocations | 15 | -7 | 5 | 13 | | |
| Private transfers | 15 | -22 | 2 | -5 | 5 | 0 |
| Private transfer inflows | 15 | 10 | 3 | 28 | 6 | 34 |
| LESS: Private transfer outflows | 0 | 32 | 1 | 33 | 1 | 34 |
| Private asset-based reallocations | 0 | 15 | 3 | 18 | -1 | 17 |
| Private asset income | 0 | 21 | 1 | 22 | 2 | 24 |
| LESS: Private saving | 0 | 6 | -2 | 4 | 3 | 7 |

Aggregate

1. What is the source of aggregate data?

- System of National Account: Indonesian Account, GDP, Input-Output Table, Social Accounting Matrix

2. Why do use aggregate data?

-Macro control for many NTA components -> NTA aggregate estimates match the SNA

-To sum up the micro survey data (Susenas) into national level and be consistent with Indonesian Account.

Indonesian Account (1)

| | | | | Total | | | | | | |

NTA Aggregate Control, Updated SAM 2008

| | Private | Gov | ROW | Sum | |
|---------|---------|-------|-----|-------|--|
| Private | 574 | 623 | 209 | 1,406 | |
| Gov | 1,399 | 392 | - | 1,791 | |
| ROW | 150 | 52 | - | 202 | |
| Sum | 2,123 | 1,066 | 209 | 3,399 | |

Issues

- Full Sequence of Accounts (FSA) based on SNA 2008 will just be finished end of 2015, some number might not be consistent
- Elaborate other Consumption (by COICOP) for strategic and policy purposes

Life Cycle Deficit : Preliminary Estimates

Indonesia

Socio-Economic Condition

- 1. Total population about 237.6 million (2010 Census)
- 2. GDP growth is high of about 6-6.5% annually
- 3. Unemployment rate on August 2014 about 5.94 %
- 4. Aging Population (aged 60 years and over) about 18 million (7.6%), and more than half of them still working
- About 60 % of workers are engaged in informal works and mostly are not covered by social protection programs
- Most of unpaid family workers are women about 13 million (73 %)
- Poverty rate declines, but in 2013 still 11.3% (about 28 million) of population living below the poverty line

Demographic Issues

Post-2015 Five Demographic Issues in Indonesia:

- continuing large number of population with a bulk of productive age people
- emerging ageing population
- urbanization
- complex population mobility and internal migration
- High number of maternal deaths

- The population was 237.6 million as of the 2010, has doubled only in about 40 years.
- Indonesia's current population structure:
 - 28% population aged below 15.
 - 64% working age population
 (15-64 yo)
 - 8% elderly population

Indonesia in 2010

Today Indonesia's population is in its favorable pace for economic development

Demographic Window of Opportunity (DWO): results of fast and then slow decline in fertility rates

After 2015, the number and percentage of population aged 60 and above will accelerate

Indonesia's Changing Dependency Ratio, 1950 to 2035

Source: Statistics Indonesia (1971-2010); Bappenas, Statistics Indonesia, and UNFPA (2013); UN Pop. Div. (2012).

"It has always been understood by proponents of the Demographic Dividend concept that certain other conditions need to be satisfied if favorable dependency ratios are to translate into economic benefits"

Among other things:

- Adequate numbers of those in the working ages need to be productively employed;
- Labour markets need to be sufficiently flexible to absorb more workers;
- In an age of increasing globalization, workers need to be internationally competitive; and
- There needs to be adequate investment.

Nevertheless there are some exciting innovations in the most recent research looking at the impact of changing population age structure on economic and social development:

- National Transfer Accounts and economic support ratios; and
- Household savings and a second demographic dividend?
