

# Working Group on Simulation Modeling

East-West Center. Population Economics

June 18<sup>th</sup>, 2010

- Rational and selfish individuals (accidental bequests)
  - Cobb-Douglas production function ( $\alpha = 1/3$ )
  - No productivity growth
  - Spanish SS pension benefits (retirement age 63)
- 
- Each country differs from other countries in the demography and labor income profile.

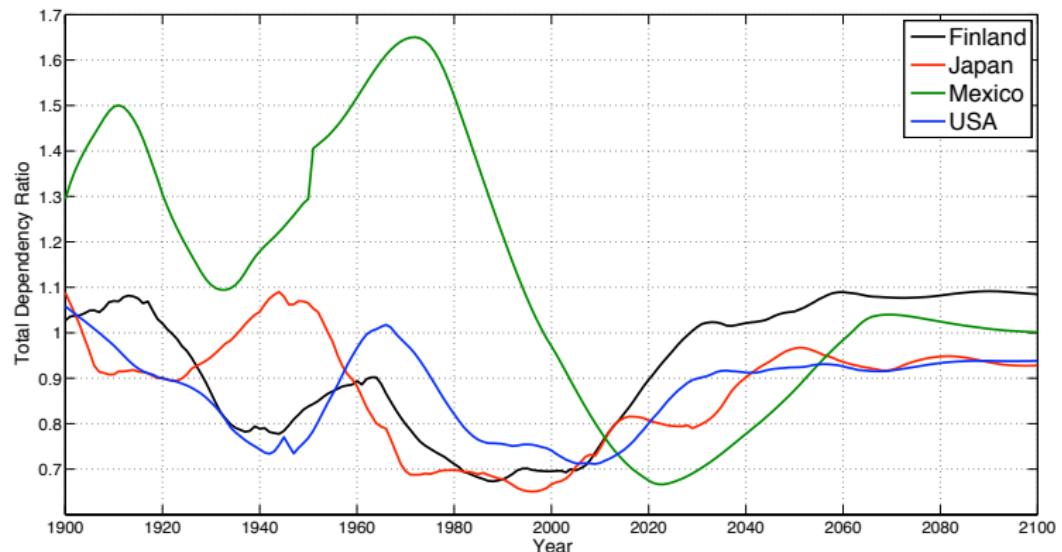

Figure: Total Dependency Ratio, 1900-2100.

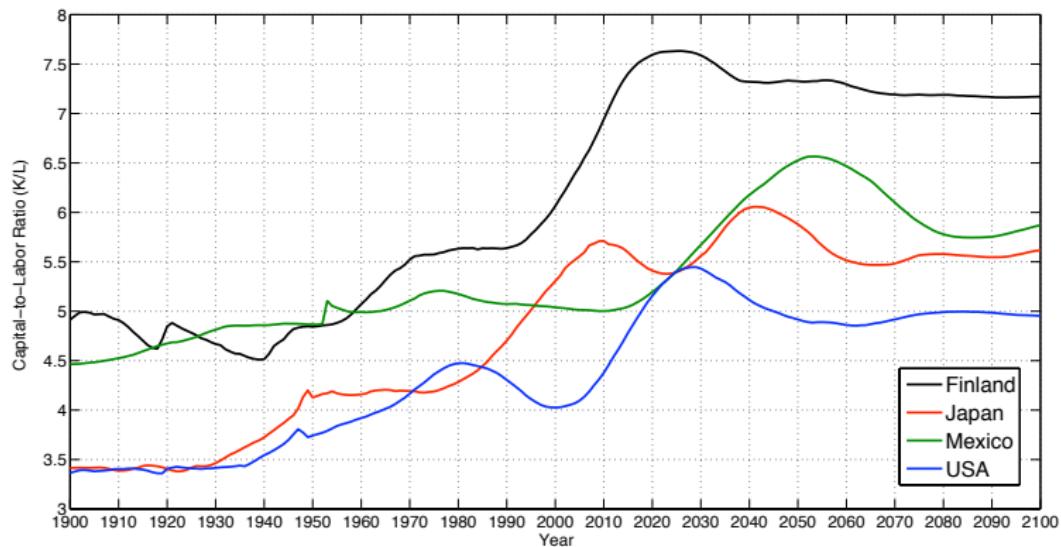

Figure: Capital-to-Labor Ratio, 1900-2100.

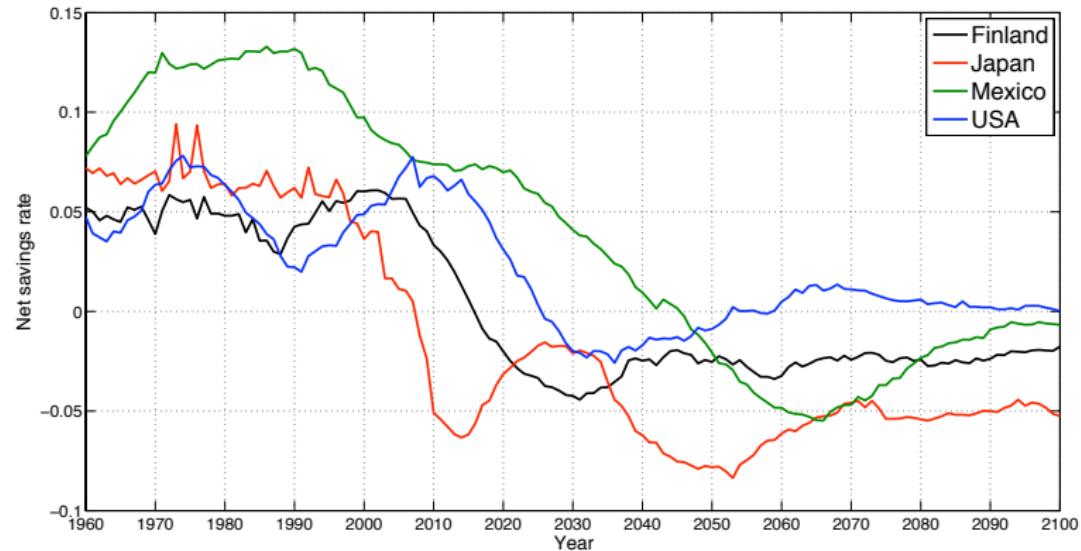

Figure: Net Savings Rate, 1960-2100.

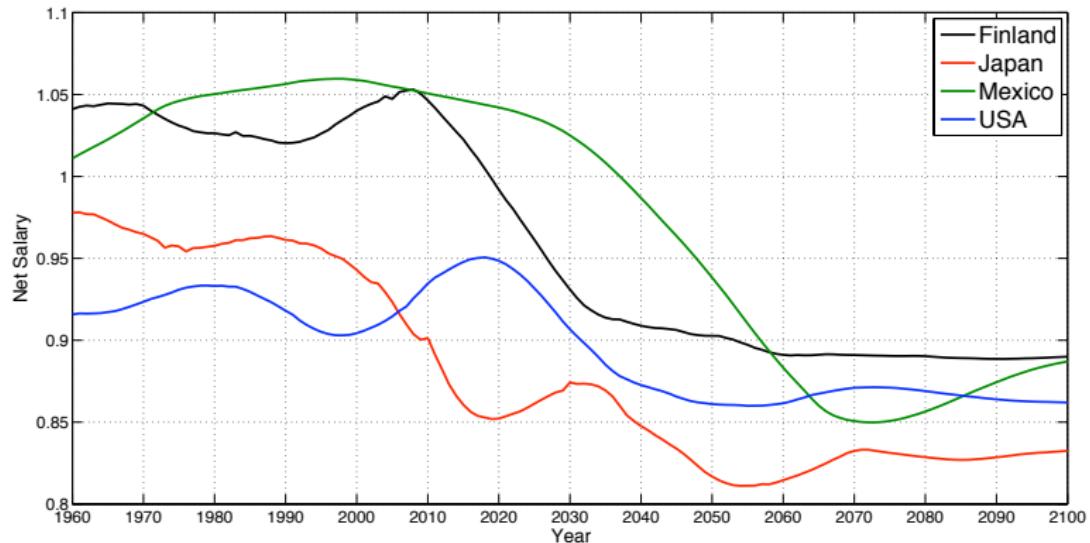

Figure: Net Salary, 1960-2100.

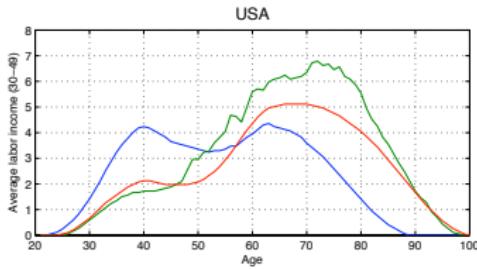

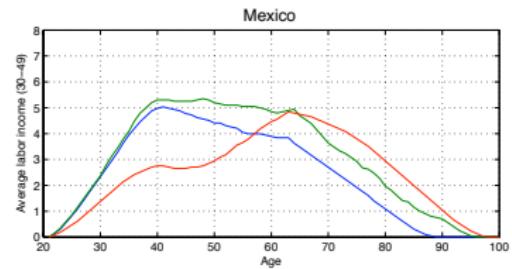

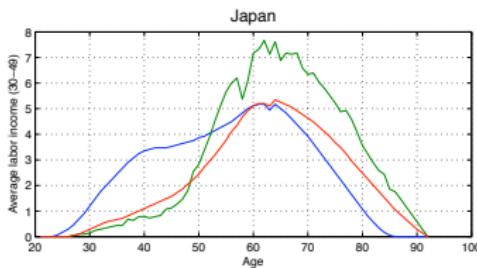

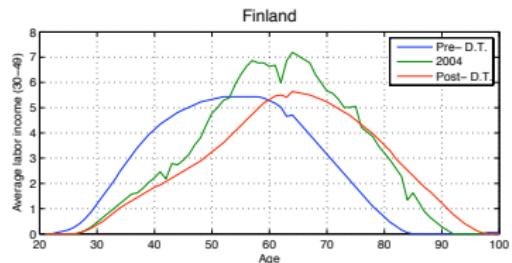

Figure: Asset Holdings by age: year 2004, pre-, post- demographic transition.

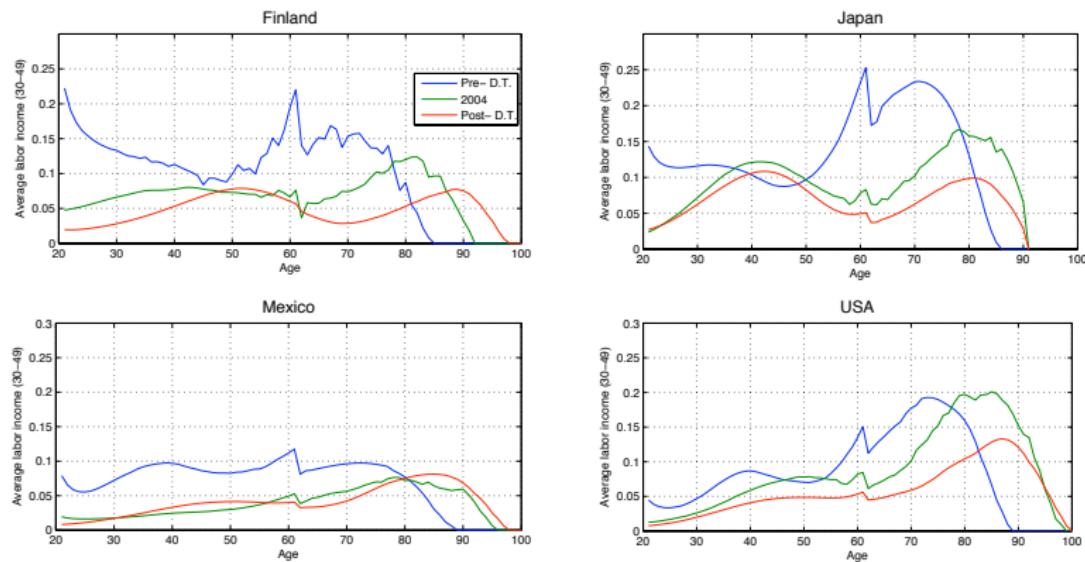

Figure: Bequest received by age: year 2004, pre-, post- demographic transition.

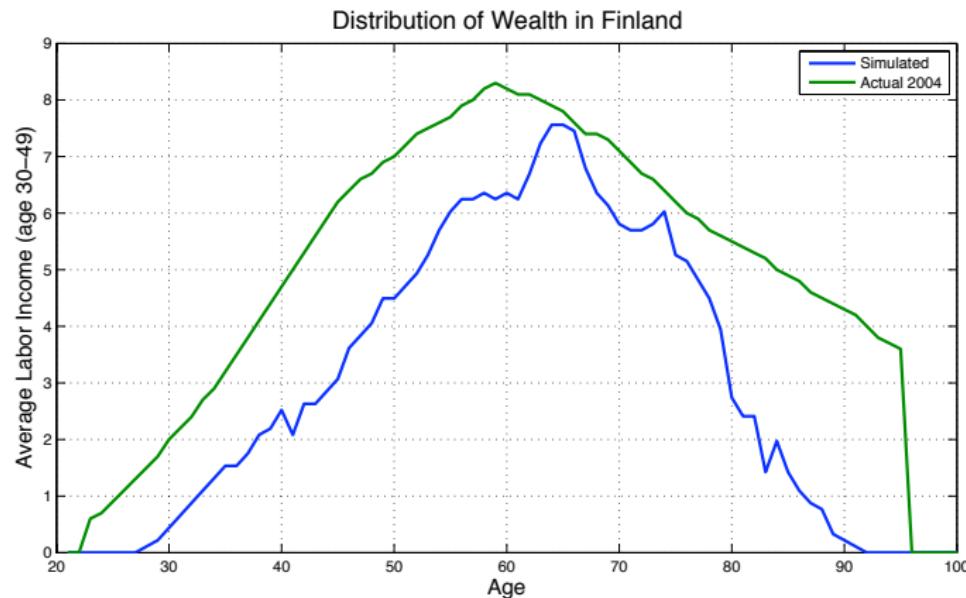

Figure: Asset holdings by age: Finland, 2004.

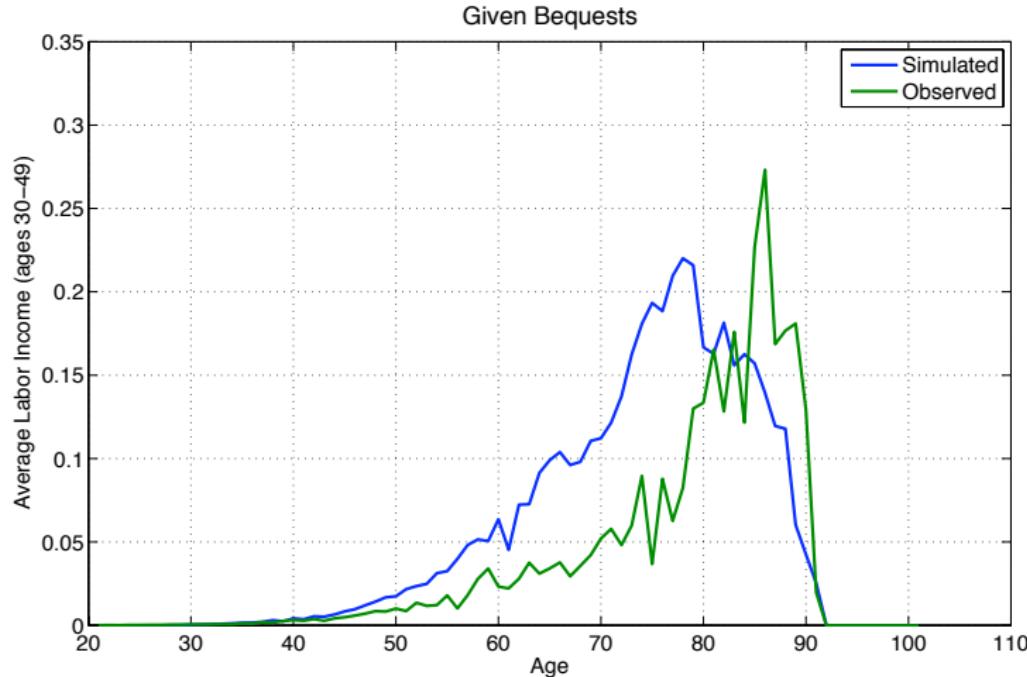

Figure: Bequest given by age: Finland, 2004.

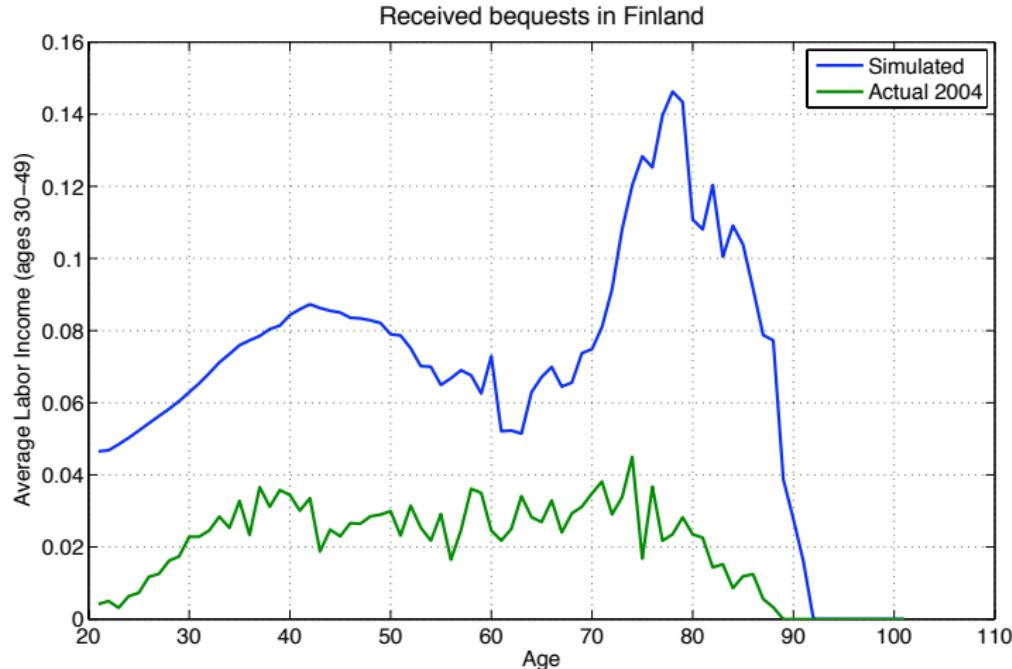

Figure: Bequest received by age: Finland, 2004.

# Conclusions and Further Research

## Conclusion

- Population Matters

## Next step

- Human capital
- Countries: Mexico, Japan, Finland, Slovenia, Sweden, Germany, Europe

# THANK YOU
