**Building Sustainable Generational Economies:  
The 14th Global Meeting of the NTA Network**

***Call for Papers***

---

University of Paris - Dauphine, February 14-17, 2023

Deadline for Submissions: ~~November 15, 2022~~ EXTENDED TO December 31, 2022

We welcome submissions for the 14<sup>th</sup> Global Meeting of the National Transfer Accounts project from project members and anyone whose work addresses issues around the generational economy. Please note a few important items:

- The conference will be fully in person in Paris, France. Speakers will be requested to post papers and slides (narrated if possible) so that those who cannot join in person may have access to presentations.
- Presentations on Day 1 of the conference (February 14) will focus on France, immediate neighbors, and Europe, in the context of the global NTA research network.
- Days 2-4 (February 15-17) will consist of paper sessions, poster sessions, training workshops, and discussion sessions on topics of interest within the NTA network.
- Registration has three parts, all available on the [conference webpage](https://ntaccounts.org/s/conference) at <https://ntaccounts.org/s/Global14> :
  1. [Submit registration information](#)
  2. If you are planning on presenting a paper or poster, [submit your abstract](#)
  3. Pay the registration fee (700€ reduced to 600€) at <https://nta14.eventbrite.com> . There is no fee for those attending only February 14.
- Lunch and morning and afternoon coffee breaks will be provided each day. For those attending the full conference, there is a gala dinner as well (will be on Wednesday or Thursday evening)
- Submissions in English and French are welcome. No translation services will be available at the conference, but we will try to group paper sessions by language.
- Information on arranging travel and booking hotel rooms is on the conference website.

## Instructions for Submitting a Paper or Poster

Go to the conference website at <https://ntaccounts.org/s/Global14>

First register for the conference by clicking on the “Registration: Click here” link. Then click on the “Submission of abstracts: Click here” link. Enter your information, with the “First Author” listed being the presenting author. This person must register for the conference. Abstracts are limited to 150 words with a maximum of 1,200 characters. Indicate whether this submission is to be considered for a paper session, a poster session, or either as the reviewers see fit. Finally, select from the list of Theme Preferences, or if no theme is appropriate, write in a theme using the “Other” option.

When you submit your form, a copy will be sent to you using the email address you entered. You may edit your responses using a link in that email, up until January 15, 2023.

Themes:

- Counting Women's Work
- Demographic Dividend
- Fiscal sustainability
- Frontiers in NTA
- Inequality in the generational economy
- Population Aging
- Viewing the World through NTA lens
- Other

There is also a form for requesting travel support on the conference webpage as well.

Anyone who needs an invitation letter for visa or work permission purposes should please contact Gretchen Donehower at [gdonehower@gmail.com](mailto:gdonehower@gmail.com) and include your passport number, passport country, and name as it appears in your passport.

## Conference Motivation and Overview

For several revision cycles of the United Nations’ global population estimates, the estimated year at which population will peak and then decline has crept closer. In some countries, fertility has fallen faster or stayed lower than previous expectations while in others, it has remained high longer than previous expectations. The COVID pandemic has introduced mortality increases of a magnitude not seen in a century in many nations and overnight altered how we care for young and old persons. Overall, the future of global population change looks to be more volatile than

expected. In this context, demography and the generational economy become central to many discussions of economic and social policy and planning. What do we need to know to build sustainable generational economies that meet the needs of all age groups and support global health, wealth, and wellbeing?

For young regions, we need to understand how to capitalize on population change to achieve demographic dividends. For aging regions, we need to examine how longer working lives, lower labor market and care economy gender gaps, or more investment in physical and human capital, may be able to sustain living standards. For all societies, we need to evaluate whether current systems of financial and social support can function as populations change, and what opportunities may arise in adapting to new realities. These are just some of the concerns relevant to building sustainable generational economies.

The 14th Global Meeting on Population and the Generational Economy will provide an opportunity for leading experts and policy makers to present and discuss evidence on how population growth and changing age structures influence macroeconomic performance, gender and generational equity, public finances, and opportunities for meeting sustainable development goals. The National Transfer Accounts (NTA) network welcomes participation from members of its over 80 country research teams and from those in government agencies, international organizations, public and private research institutions, media, and universities. The conference will be held in person at the University Paris Dauphine-PSL, LEDA-DIAL, in Paris, France from February 14-17, 2023.

The first day of the conference will be targeted to a general audience of policy makers, media, researchers, students, and the public. Issues relevant to France, Europe, and immediate neighbors will be highlighted. The subsequent days of paper presentations, workshops, training programs, and discussion groups will be targeted to members or prospective members of the NTA network but anyone interested in economic demography is welcome. Training workshops will be offered each day, including NTA basics and extended topics such as measuring the gendered economy using National Time Transfer Accounts.

This meeting is co-organized by the Paris Dauphine University and by the Center for the Economics and Demography of Aging at the University of California in Berkeley (CEDA).
