

Results and issues: NTA in Argentina

Pablo Comelatto

Centro de Estudios de Población-
CENEP

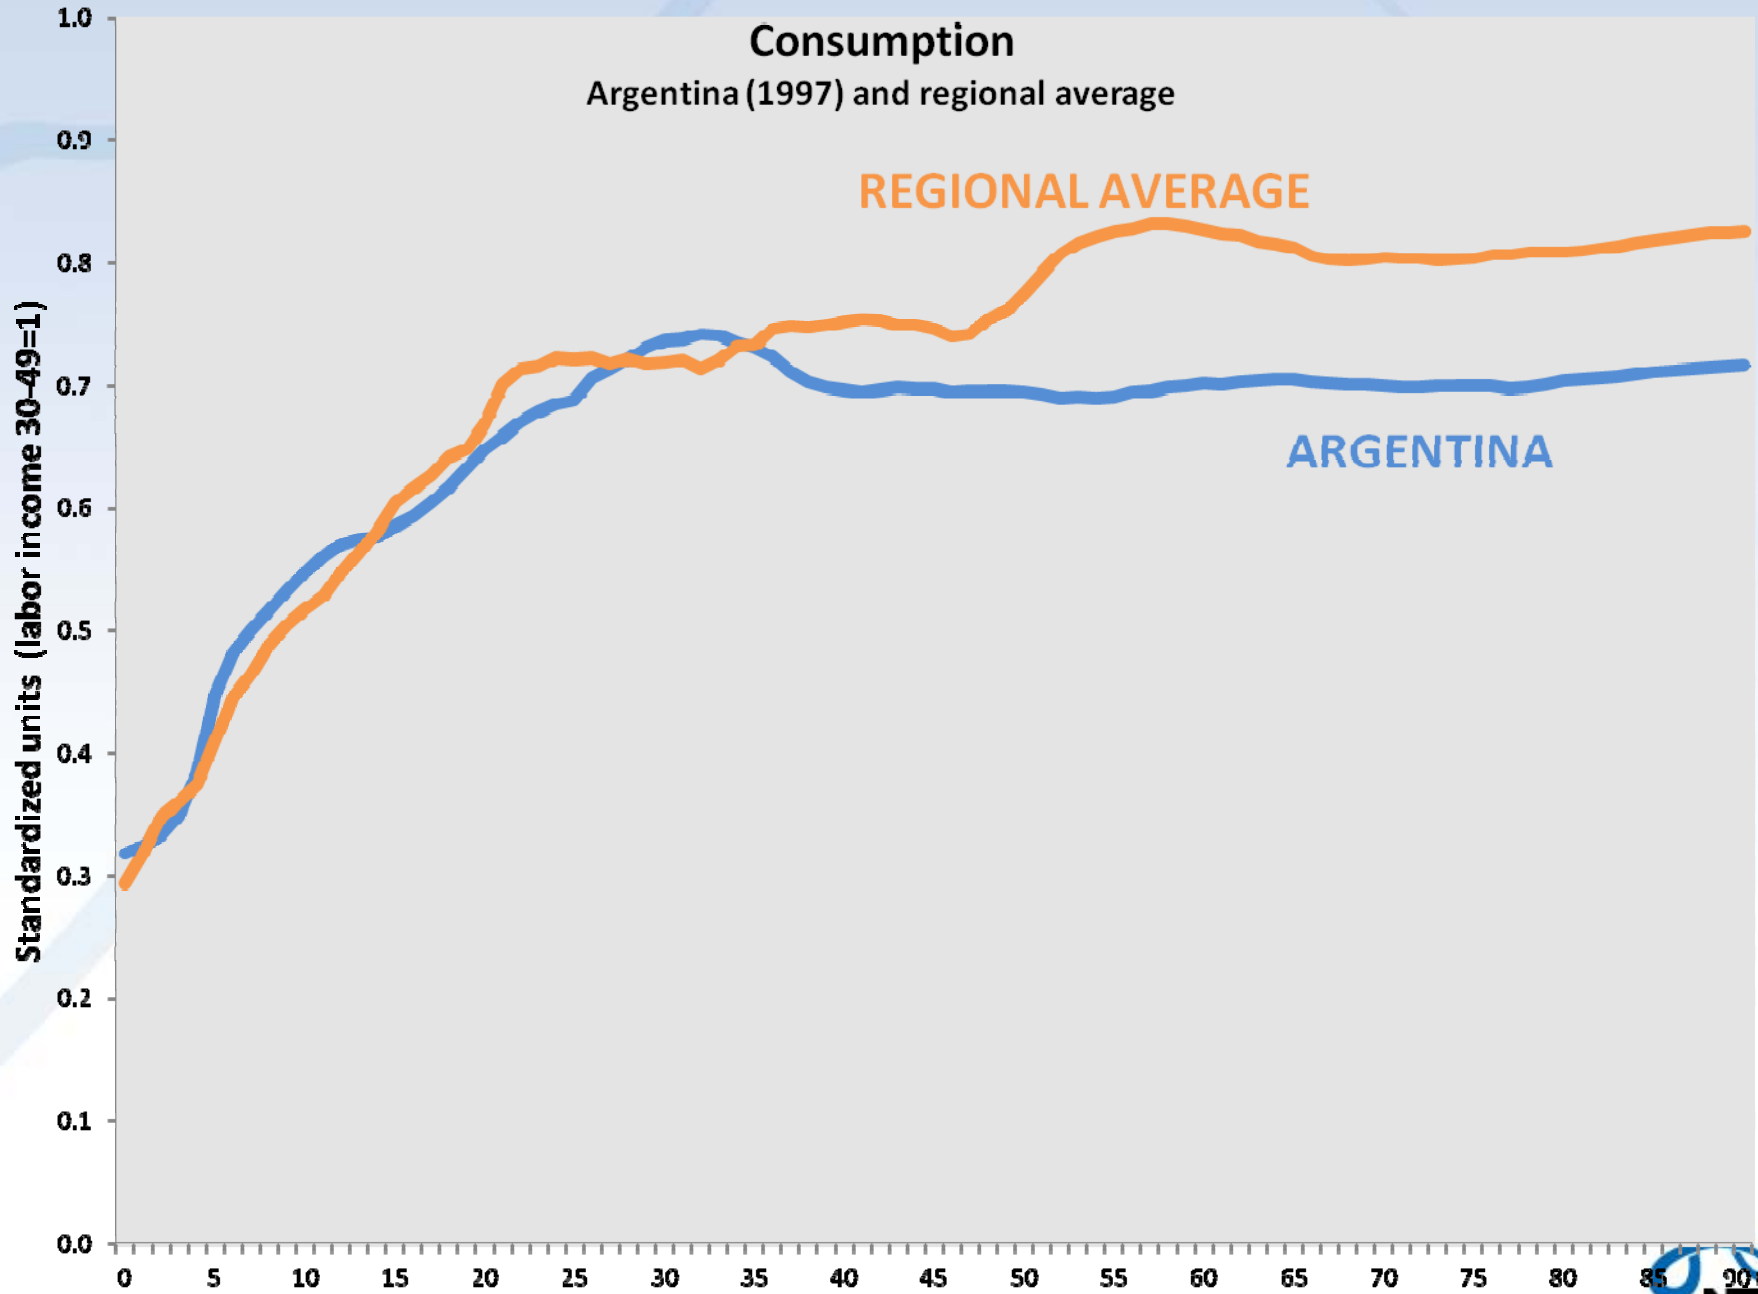

- Present results of
 - LCD and its components and
 - Public transfersfor Argentina (1997)
- Compare Argentina's profiles with a regional unweighted average of four Latin American countries:
 - Brazil (1996)
 - Chile (1997)
 - Costa Rica (2004)
 - Uruguay (1994)
- When data for a given variable is not available for all 4 countries, individual countries profiles are used

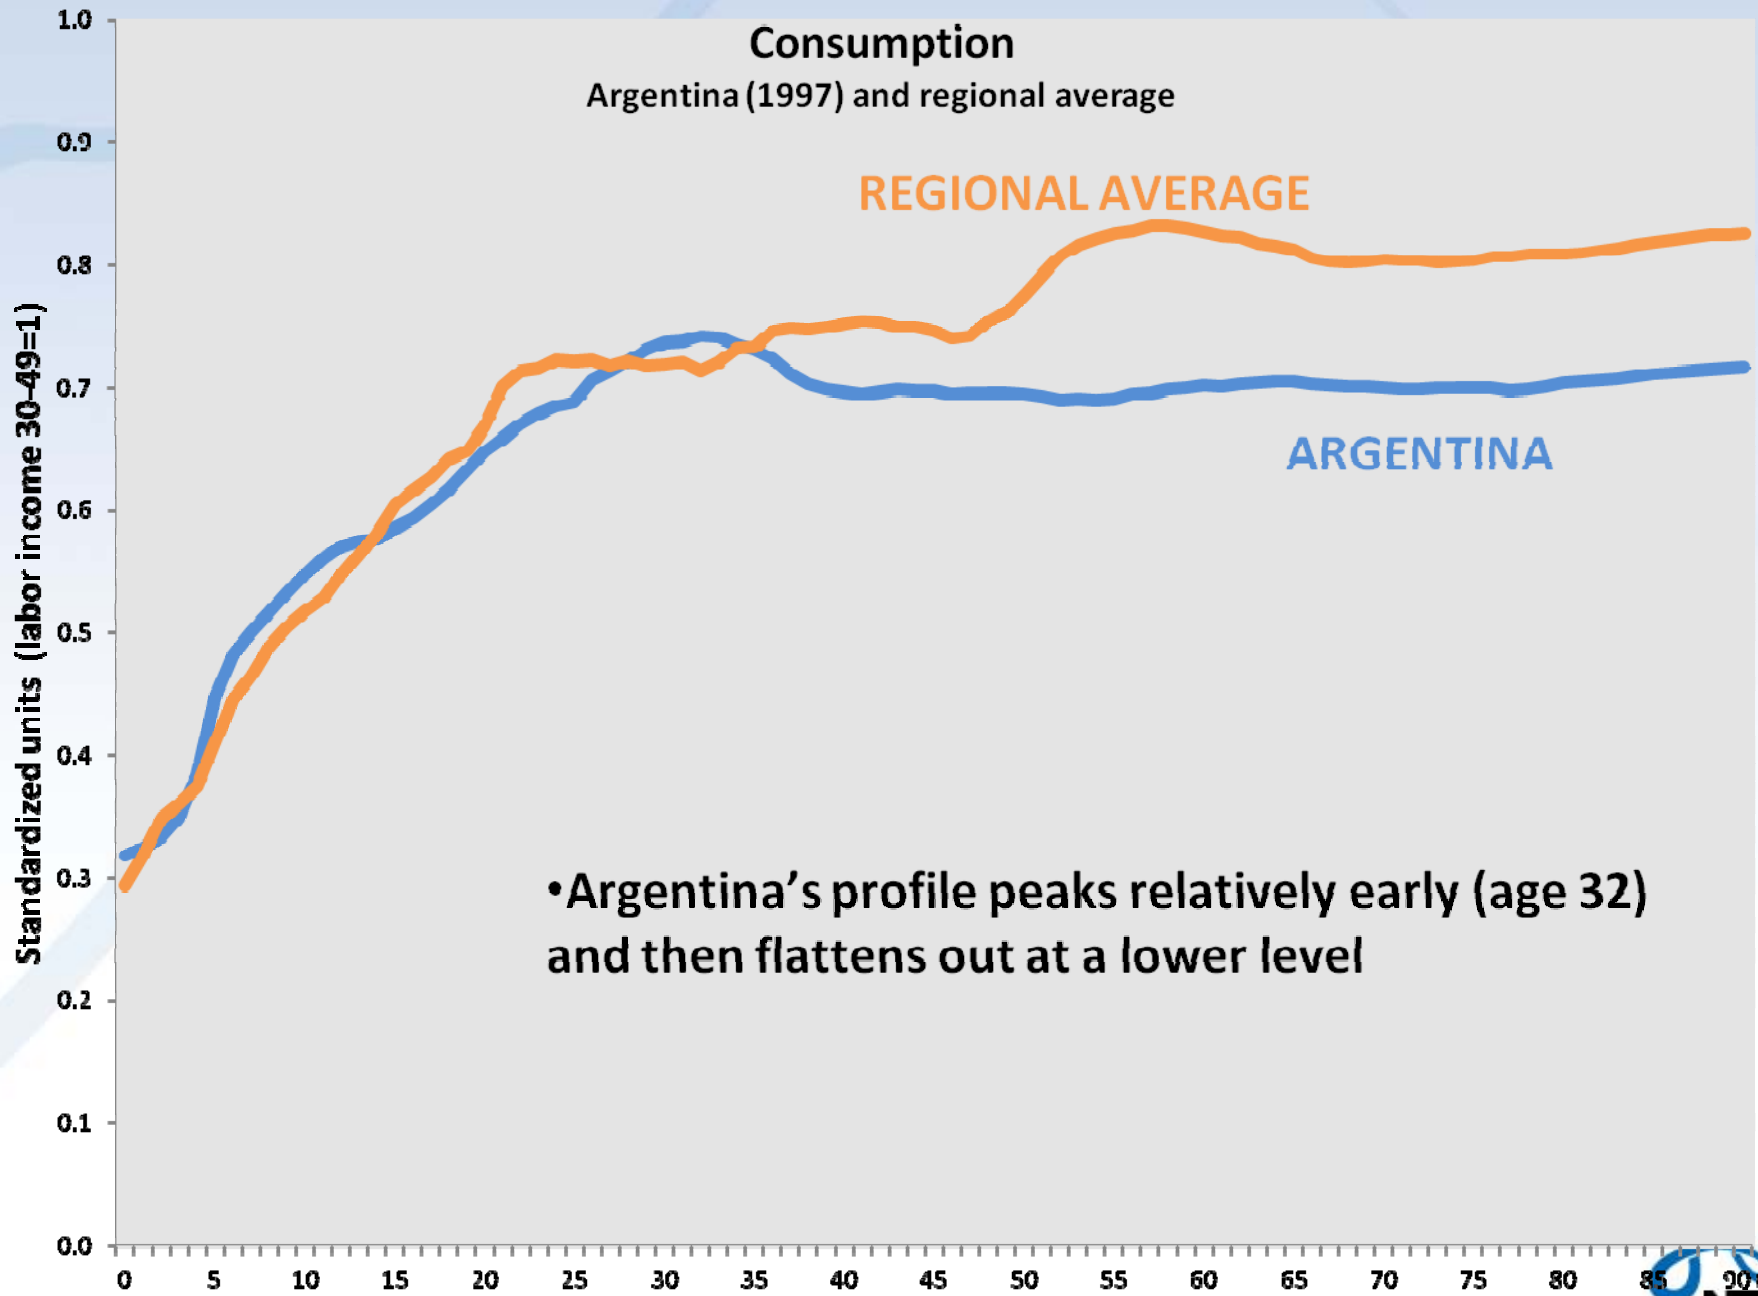

Data sources

- Encuesta Permanente de Hogares, 1997
- Encuesta Nacional de Gastos de los Hogares 1996-97
- Input-output table-1997, National Accounts.
- Last available year with (relatively) complete national accounts.
- NTA data

Consumption

Argentina (1997) and regional average

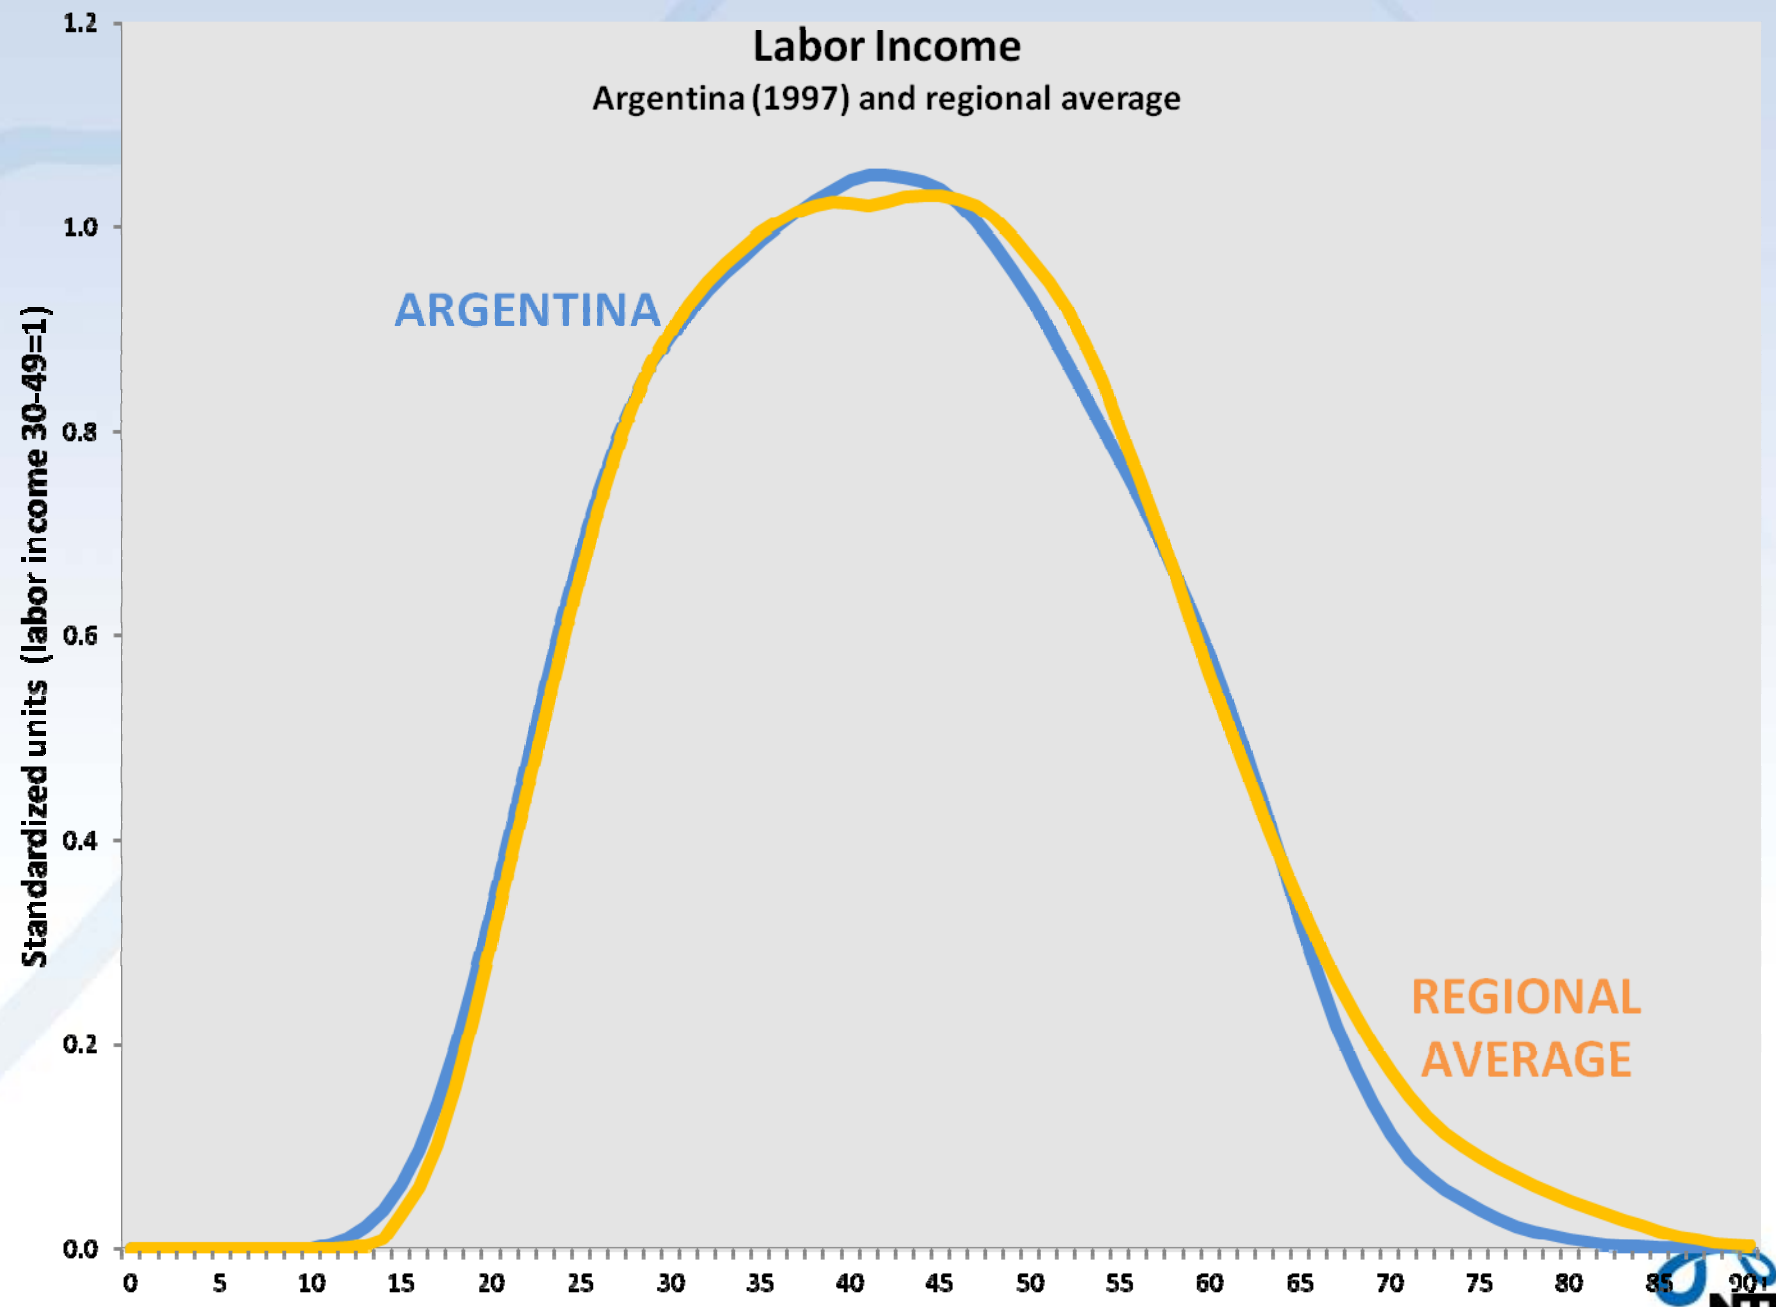

- Argentina's profile peaks relatively early (age 32) and then flattens out at a lower level

- Argentina's profile peaks relatively early (age 32) and then flattens out at a lower level
- Mainly because of private health consumption

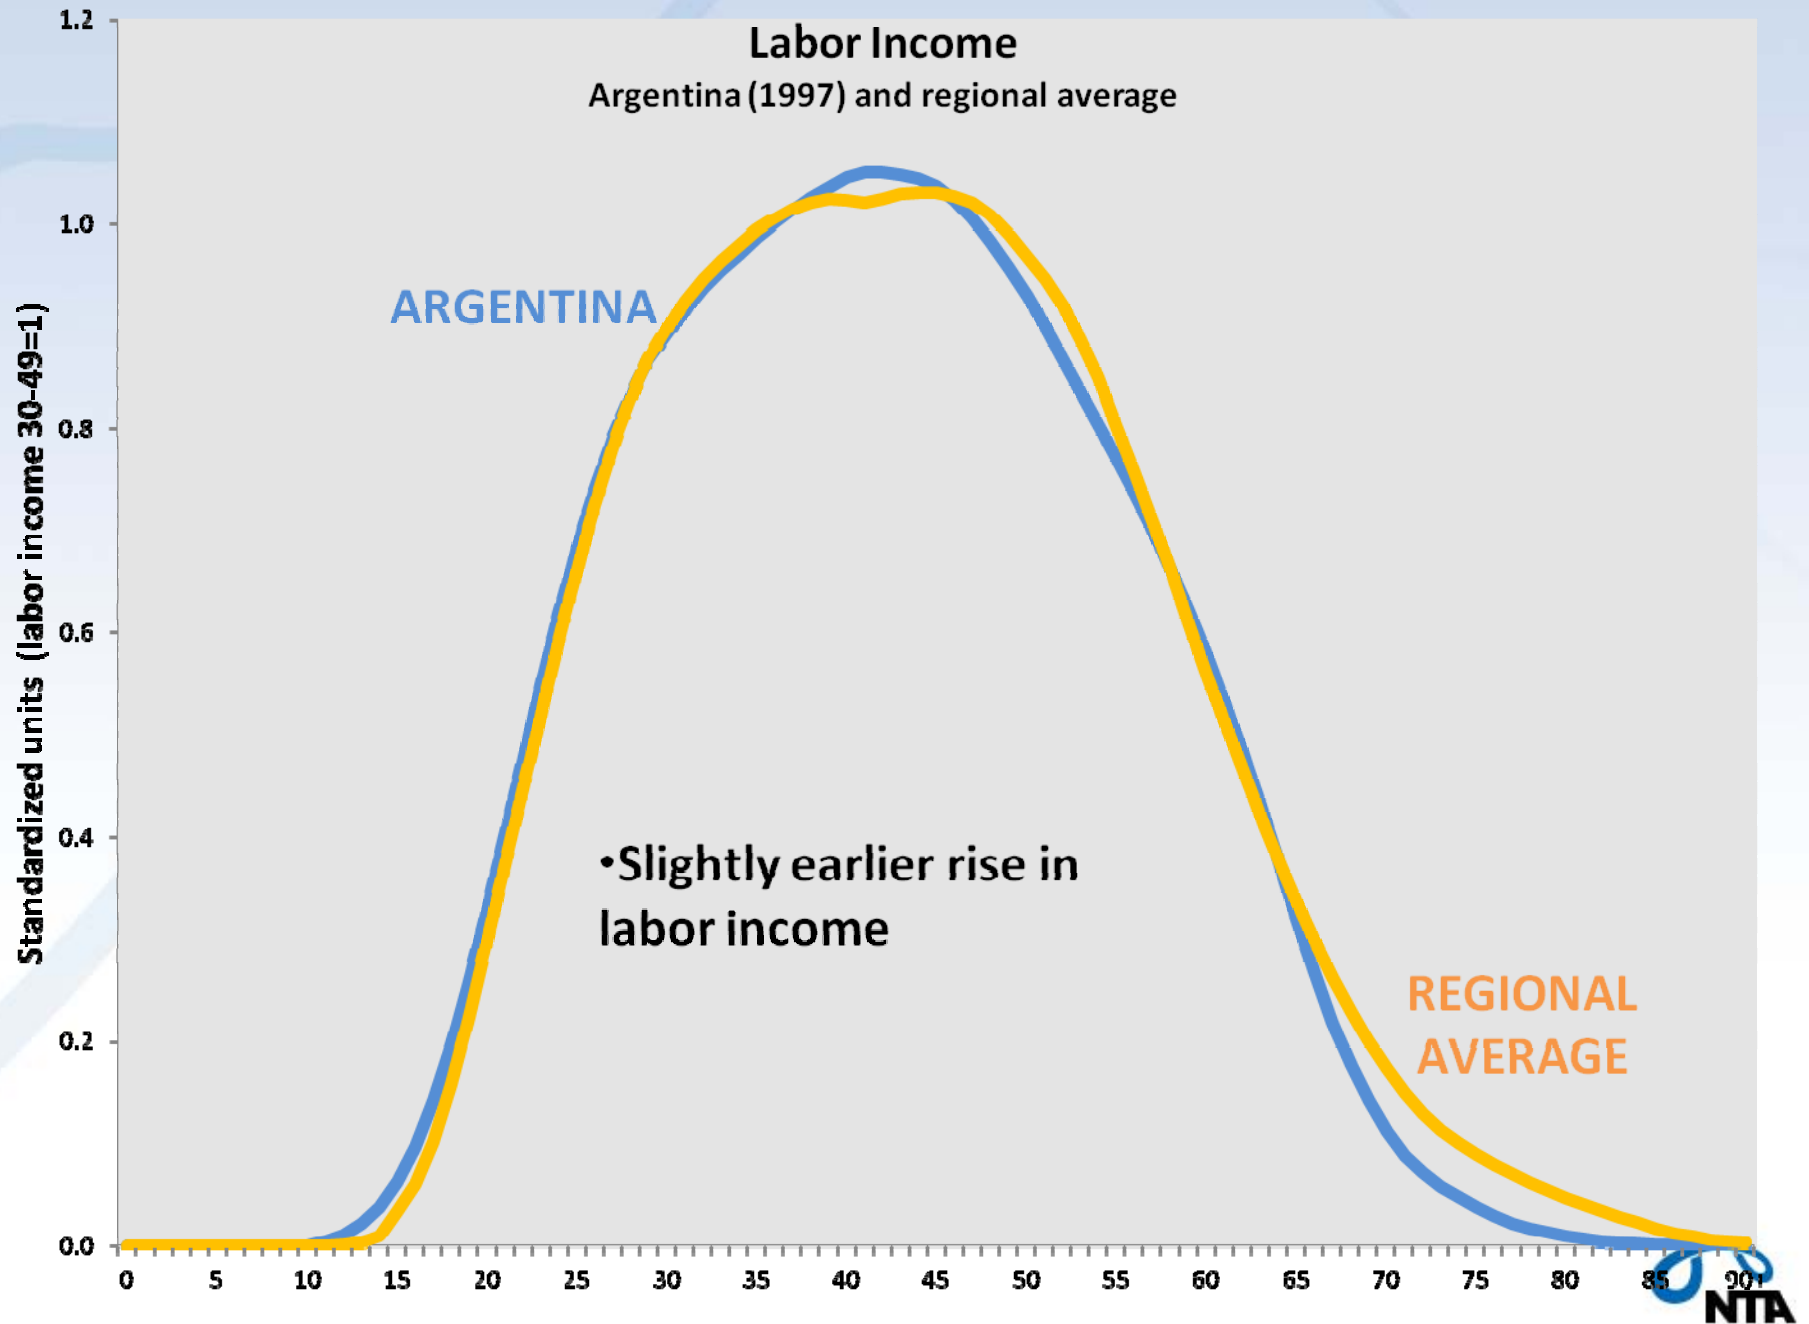

Labor Income

Lifecycle Deficit

Argentina (1997) and regional average

Lifecycle Deficit

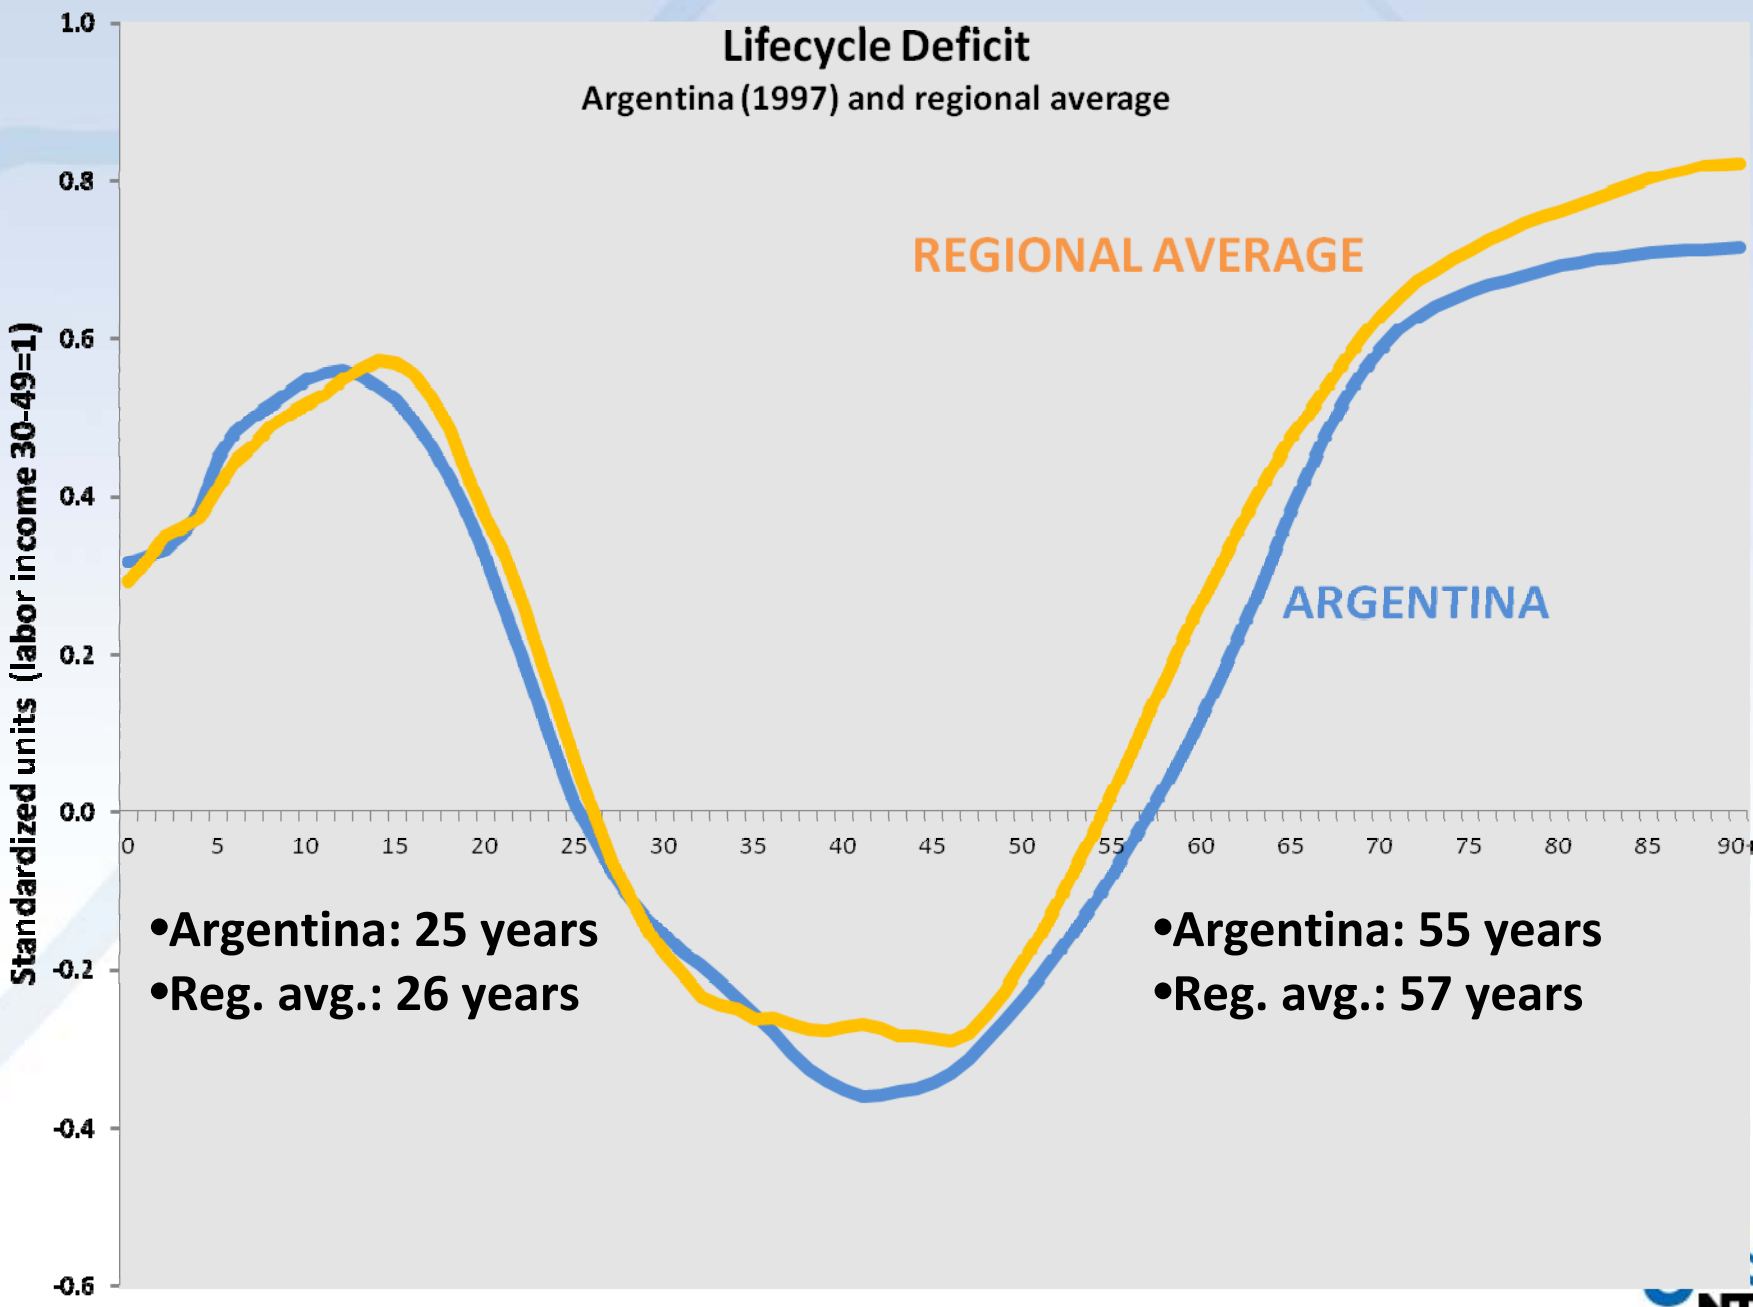

Argentina (1997) and regional average

- Argentina: 25 years
- Reg. avg.: 26 years

Lifecycle Deficit

Argentina (1997) and regional average

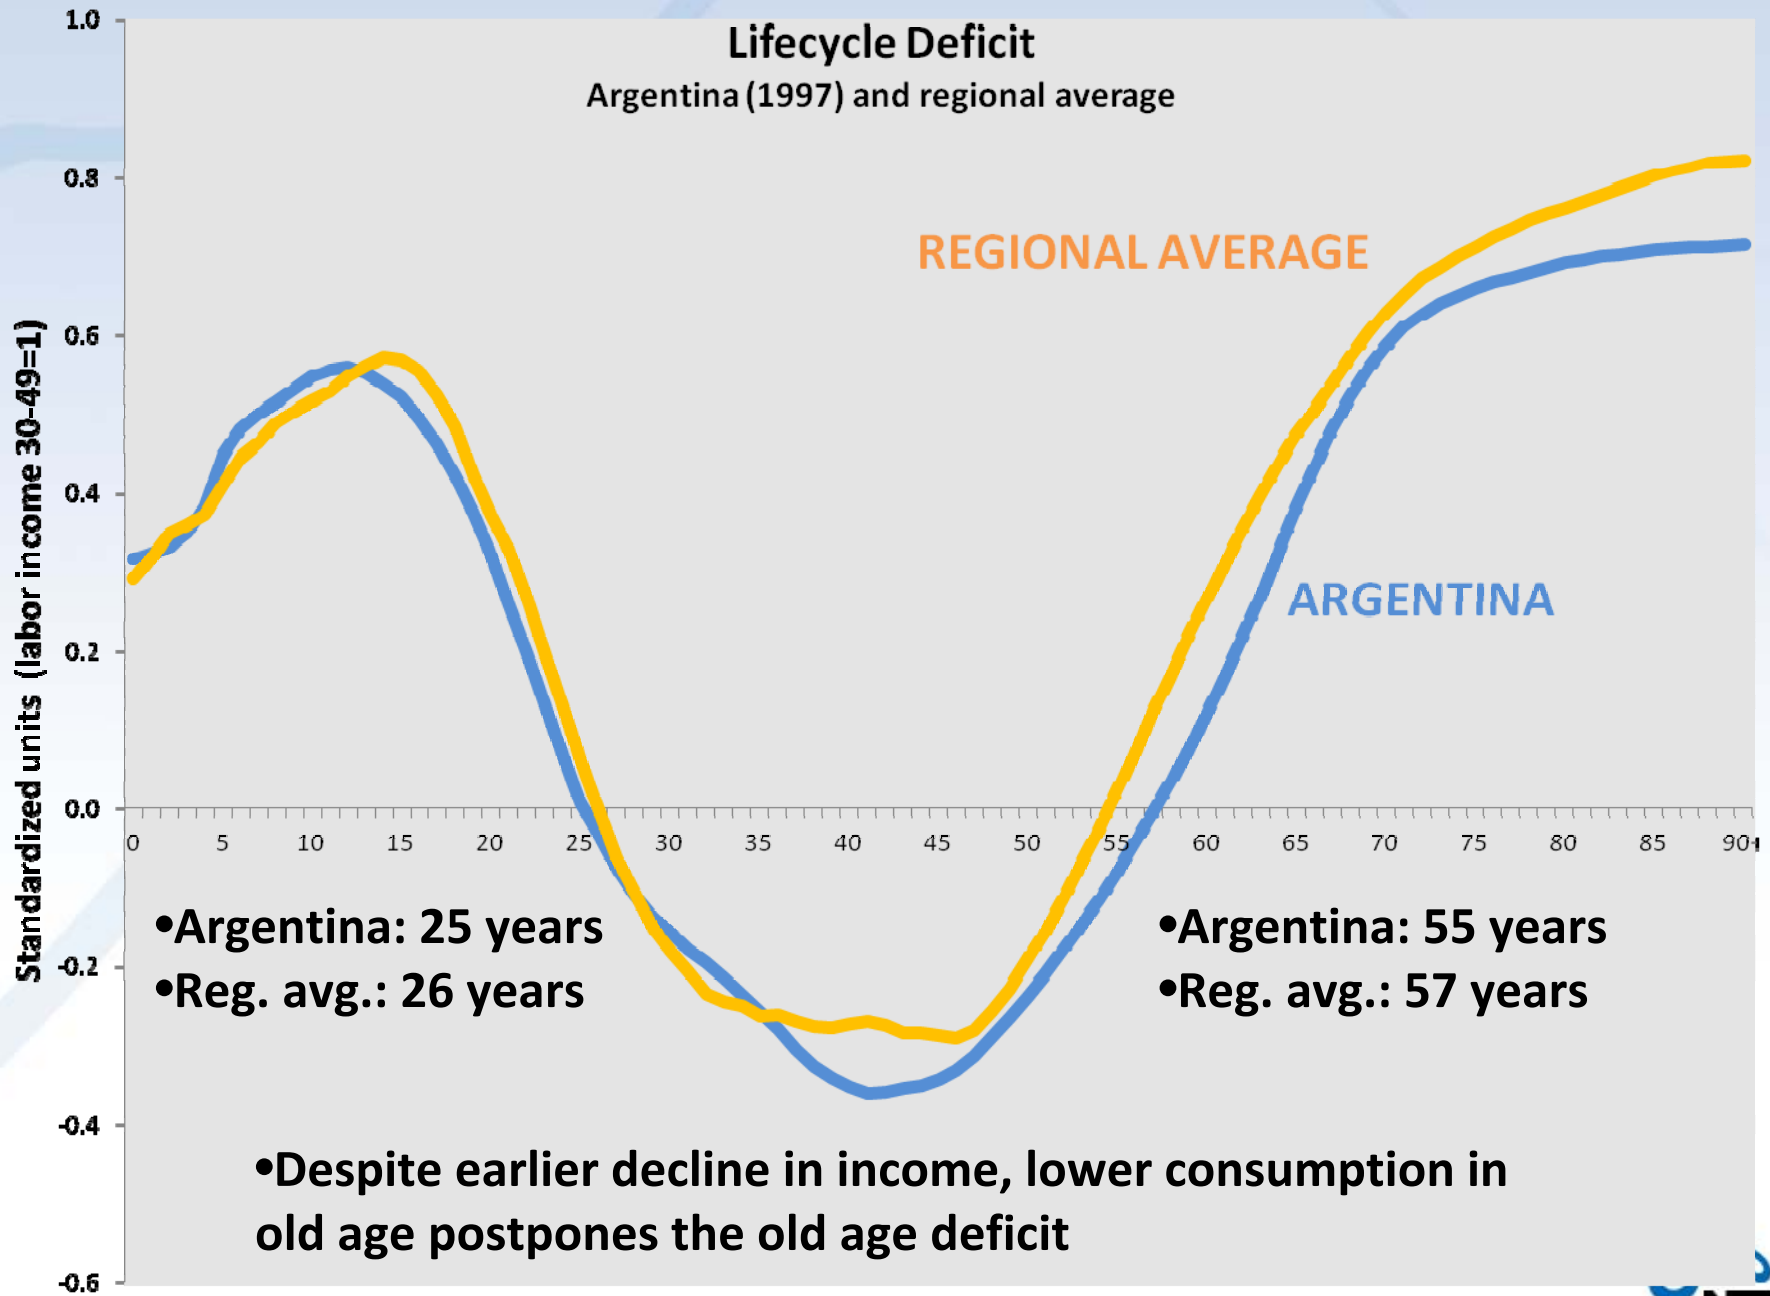

•Argentina: 25 years
•Reg. avg.: 26 years

•Argentina: 55 years
•Reg. avg.: 57 years

Lifecycle Deficit

Argentina (1997) and regional average

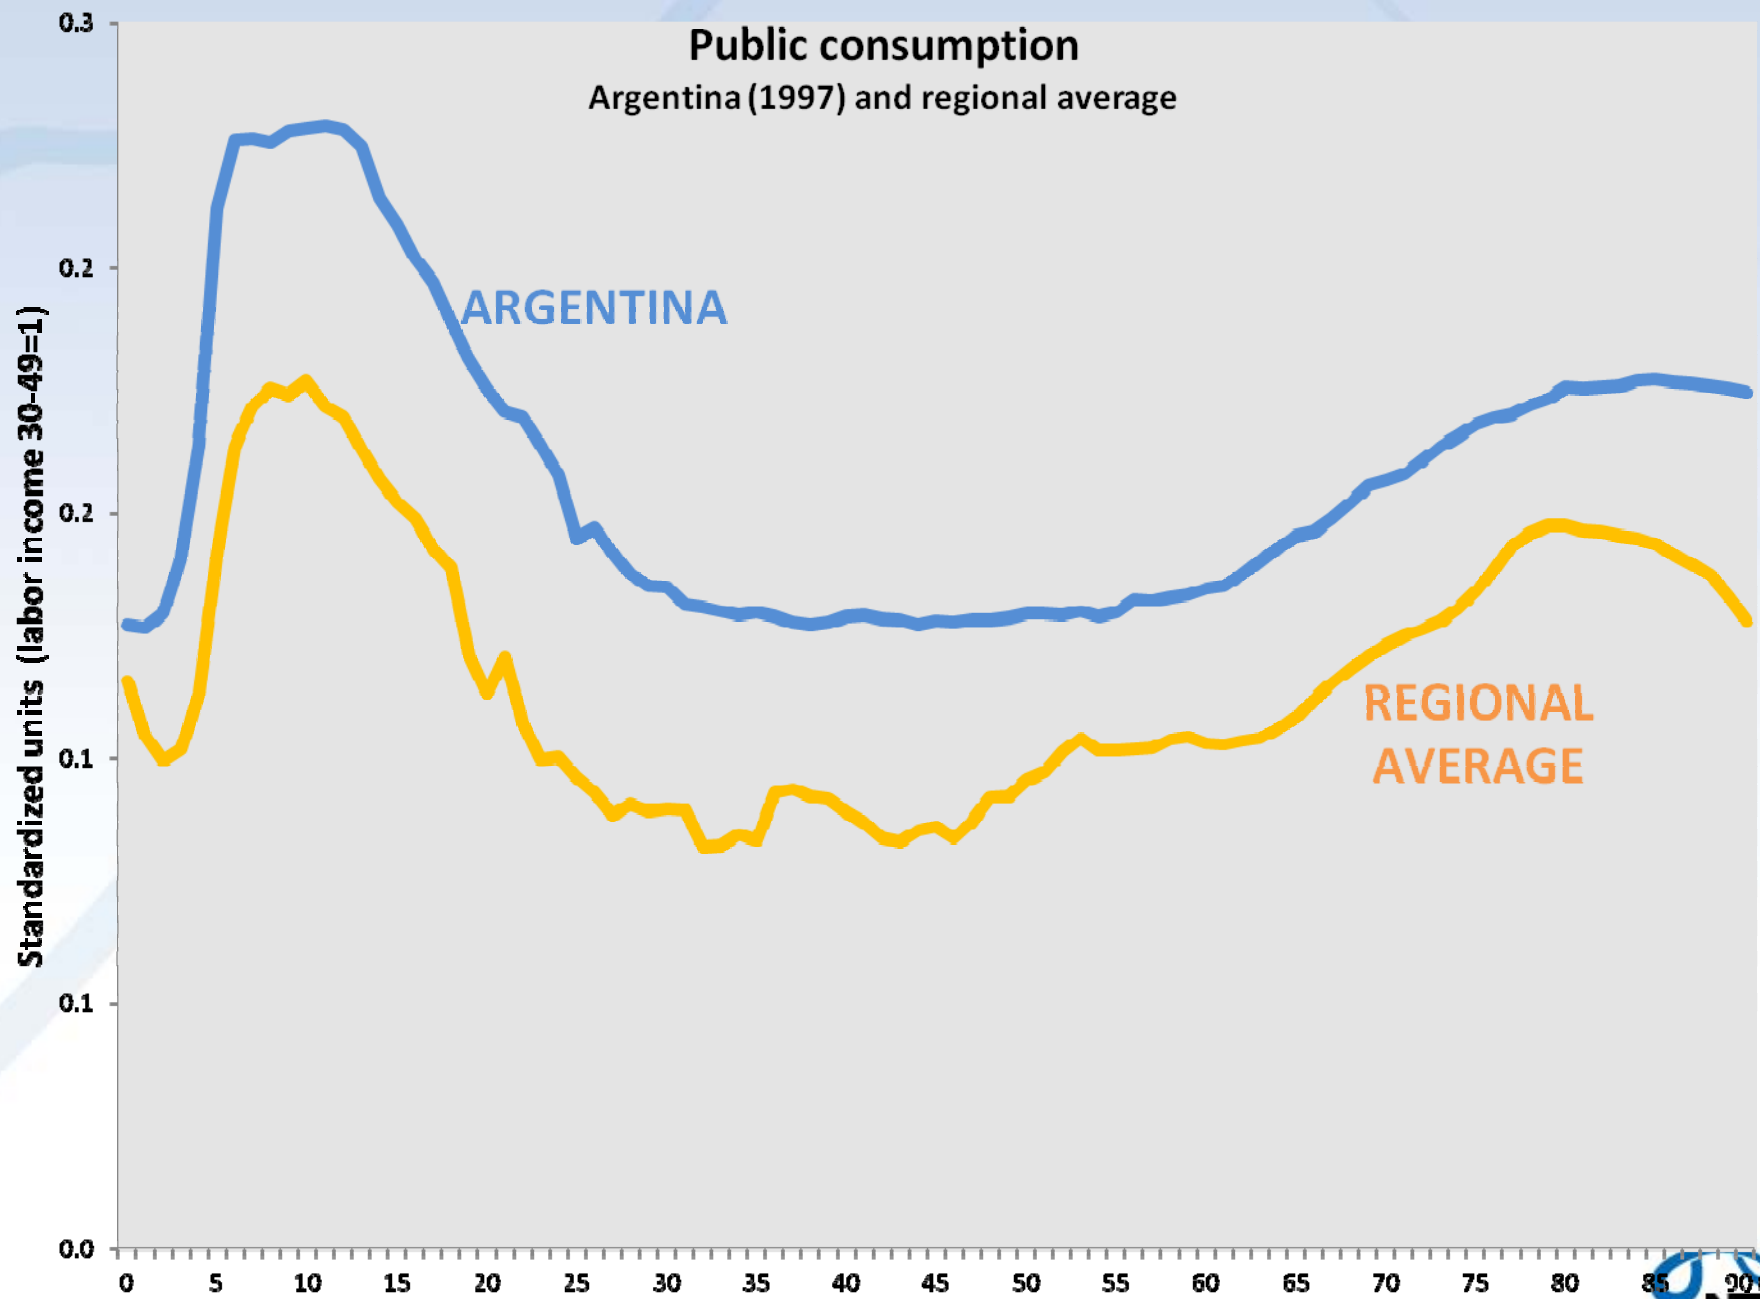

- Argentina: 25 years
- Reg. avg.: 26 years

- Argentina: 55 years
- Reg. avg.: 57 years

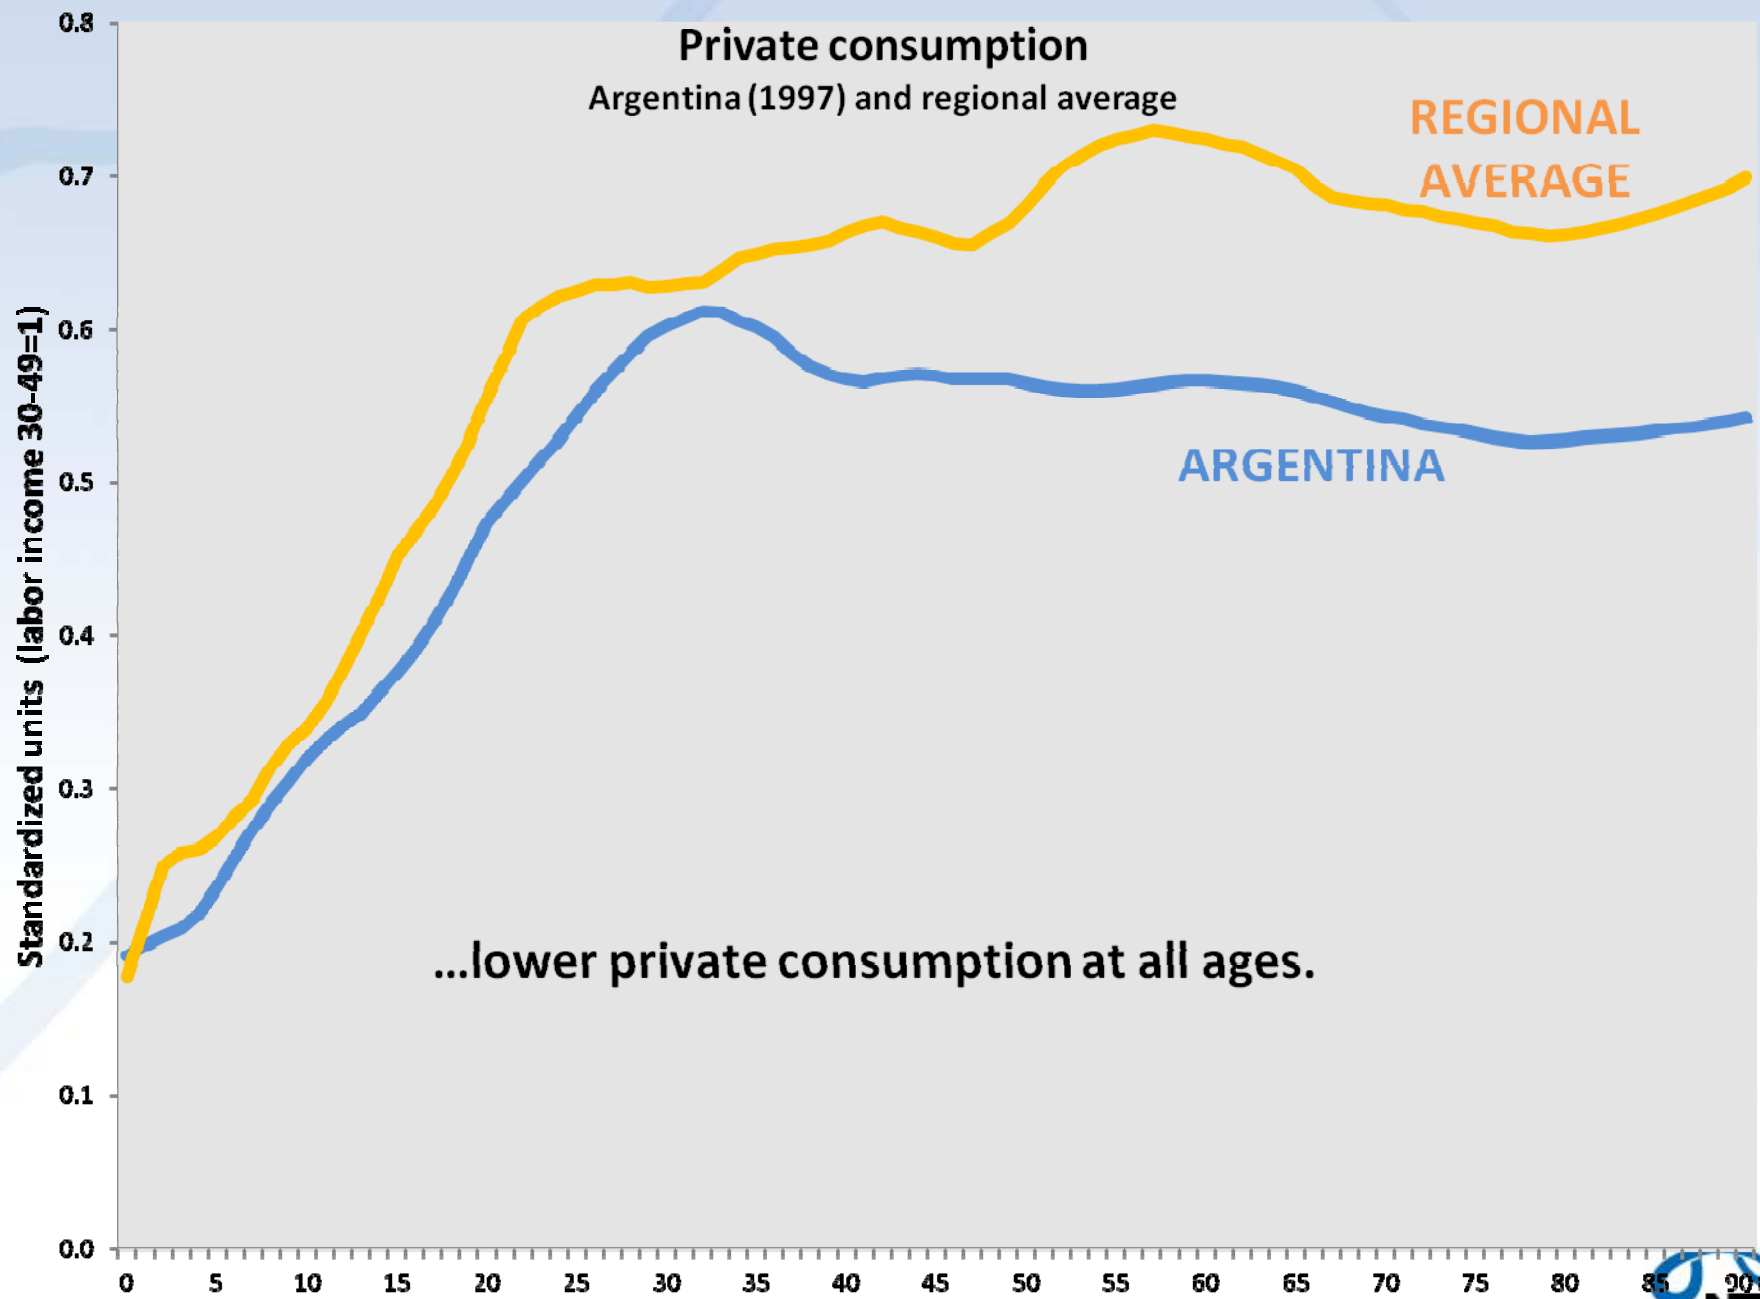

•Despite earlier decline in income, lower consumption in old age postpones the old age deficit

Public consumption Argentina (1997) and regional average

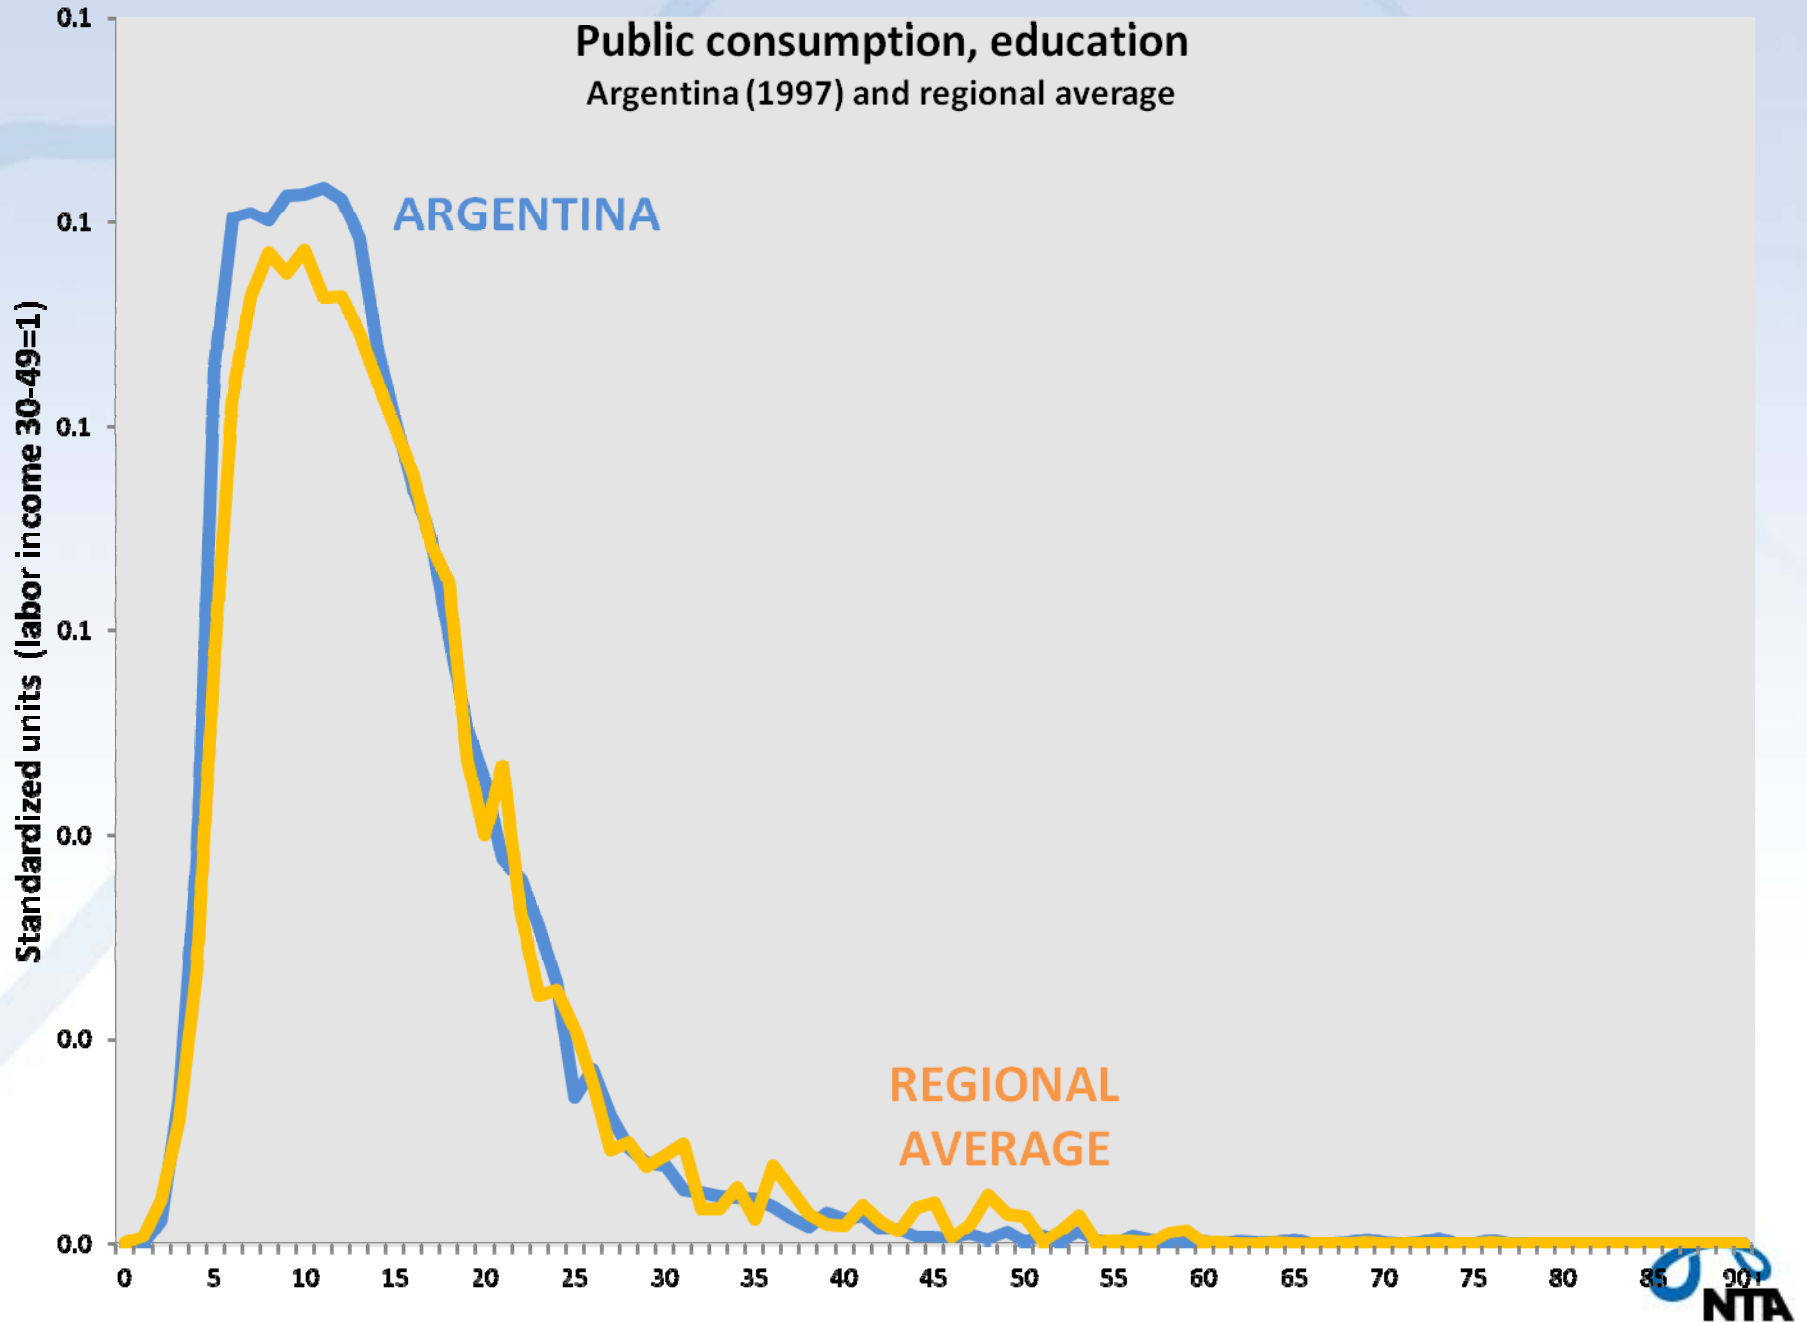

Higher public consumption at all ages, but...

...lower private consumption at all ages.

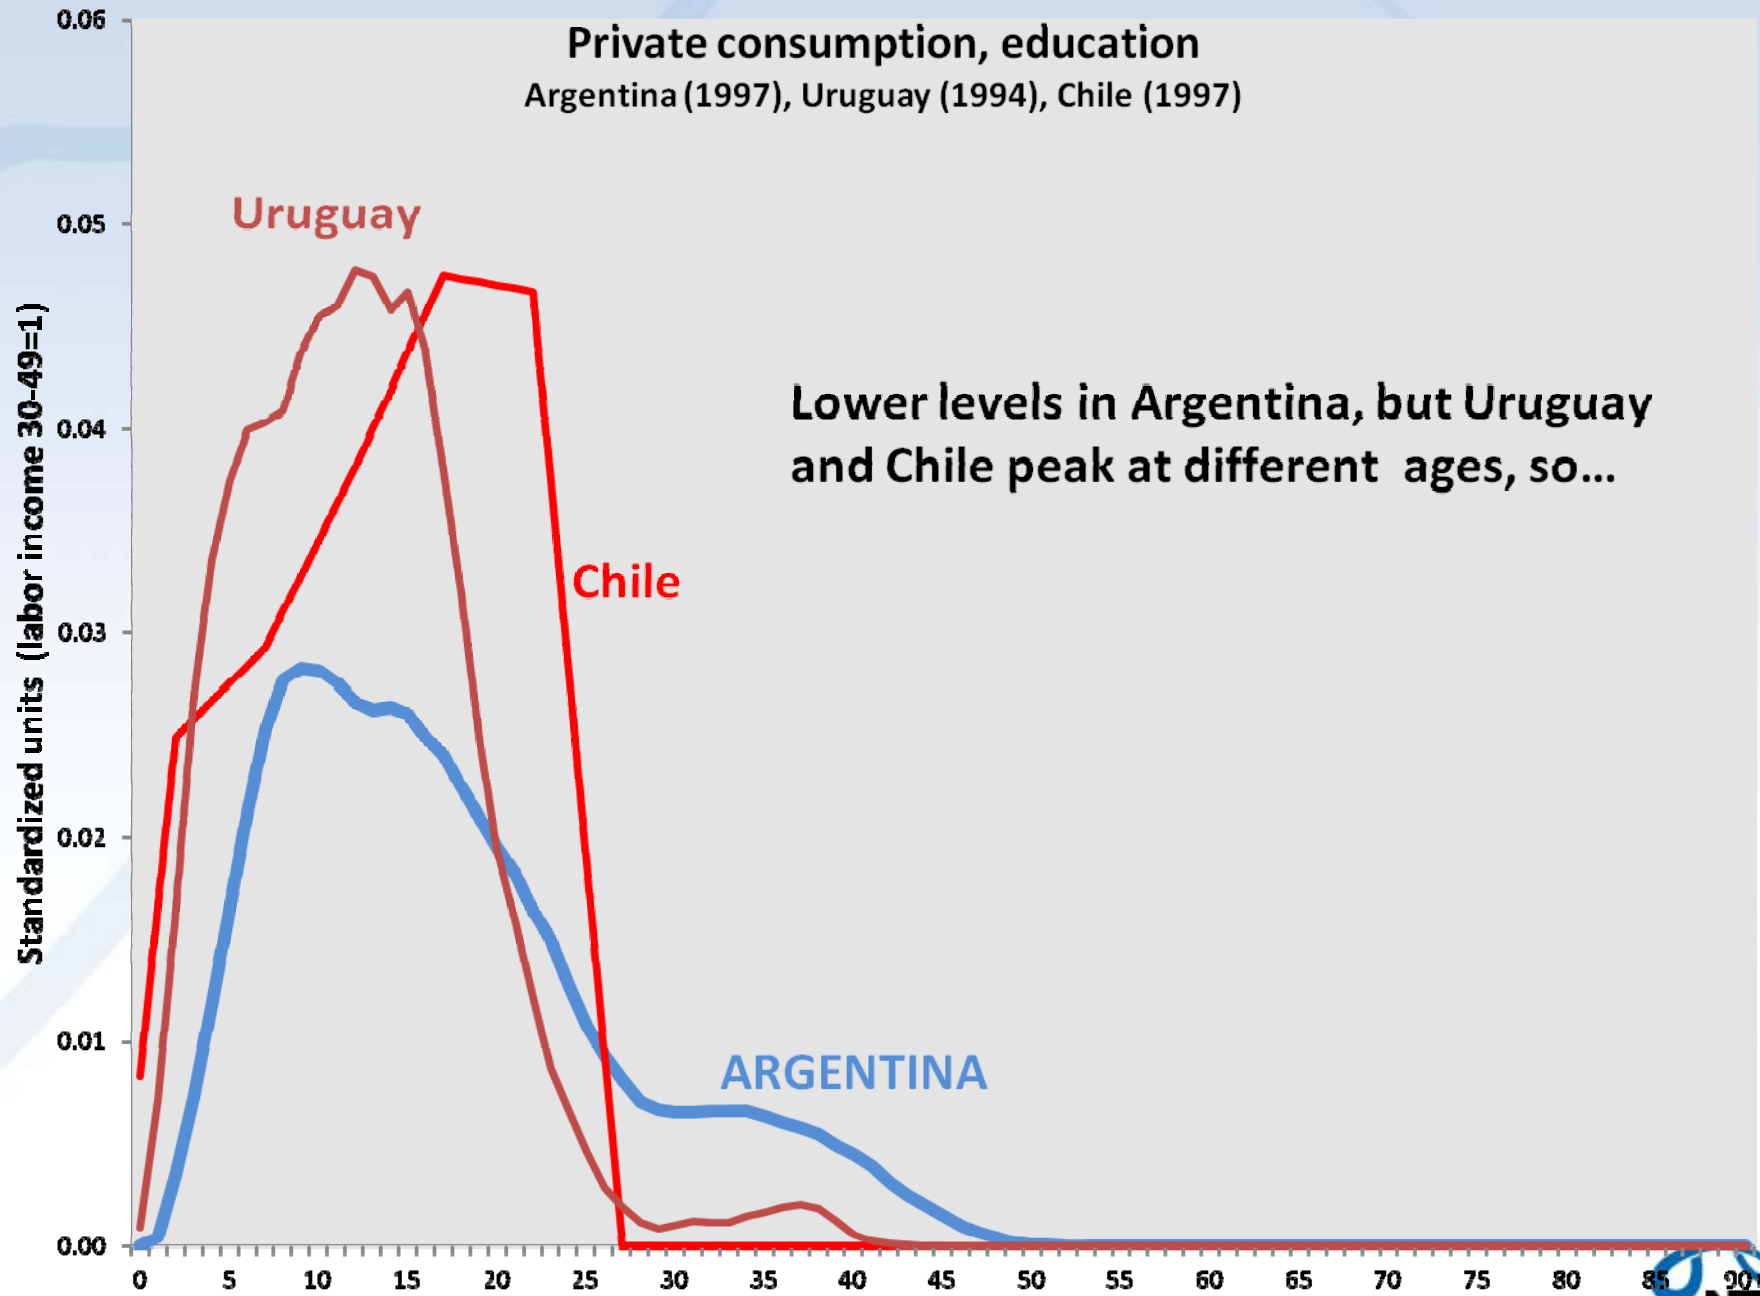

Public consumption, education Argentina (1997) and regional average

Private consumption, education Argentina (1997), Uruguay (1994), Chile (1997)

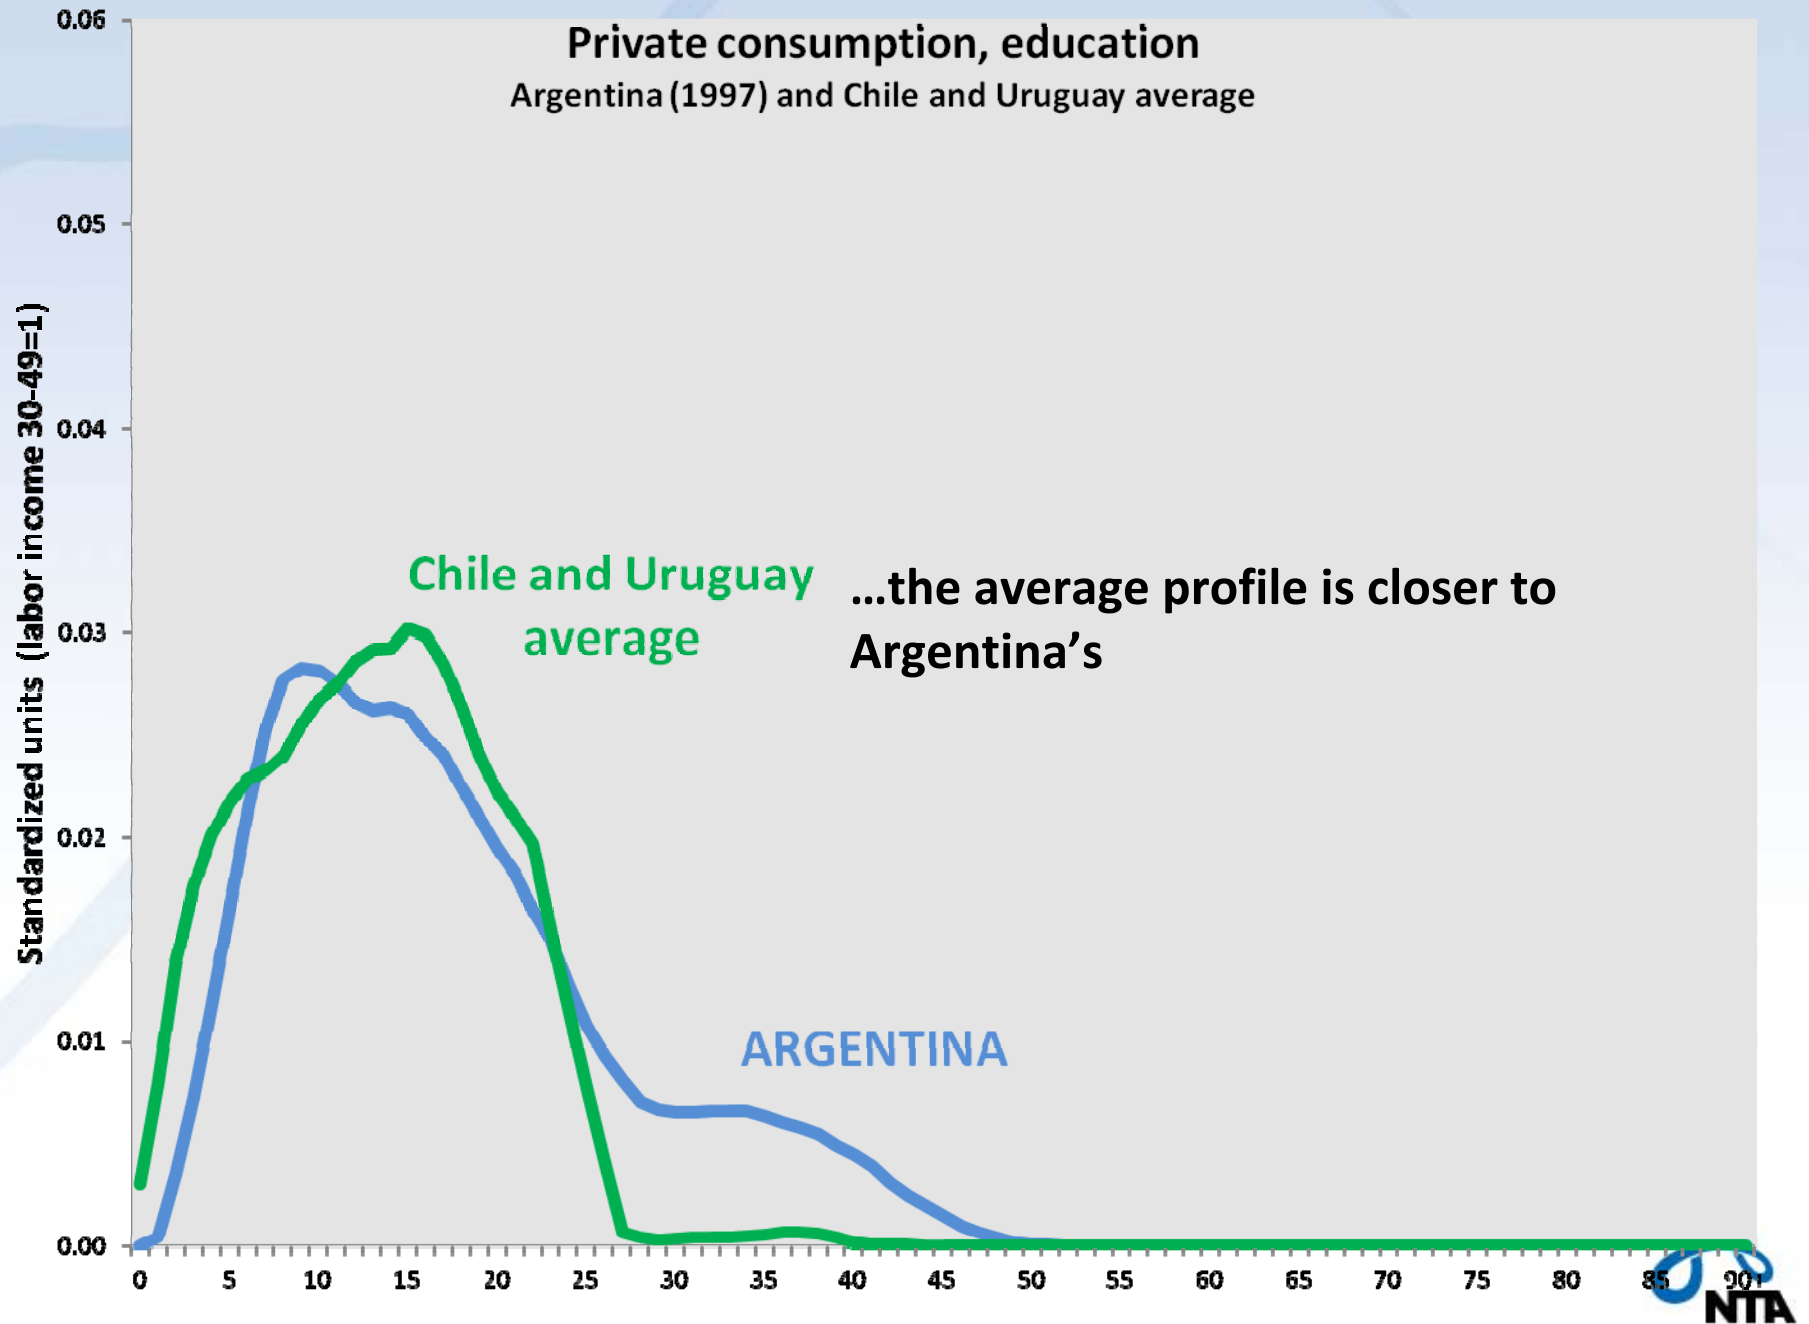

Private consumption, education Argentina (1997), Uruguay (1994), Chile (1997)

Lower levels in Argentina, but Uruguay and Chile peak at different ages, so...

Private consumption, education Argentina (1997) and Chile and Uruguay average

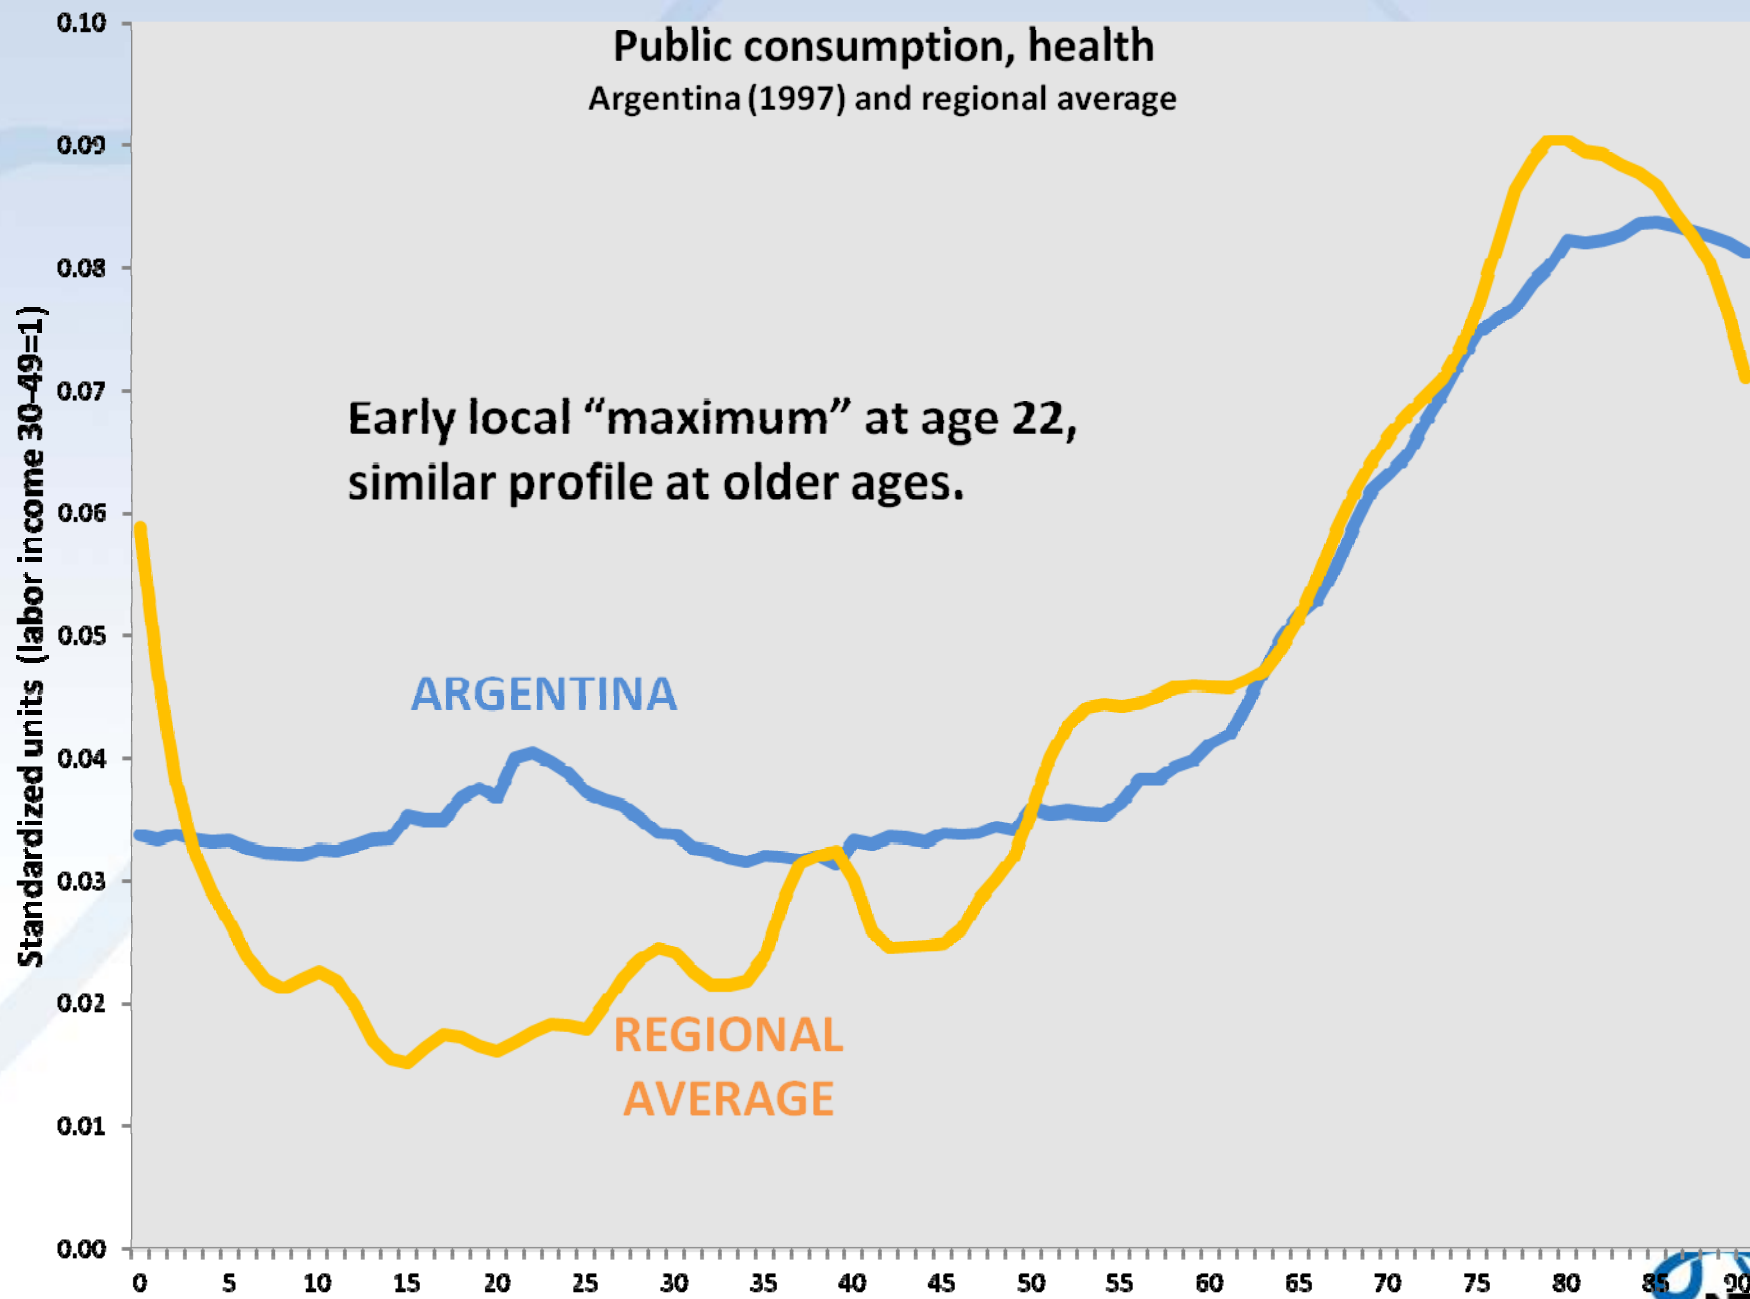

Public consumption, health

Argentina (1997) and regional average

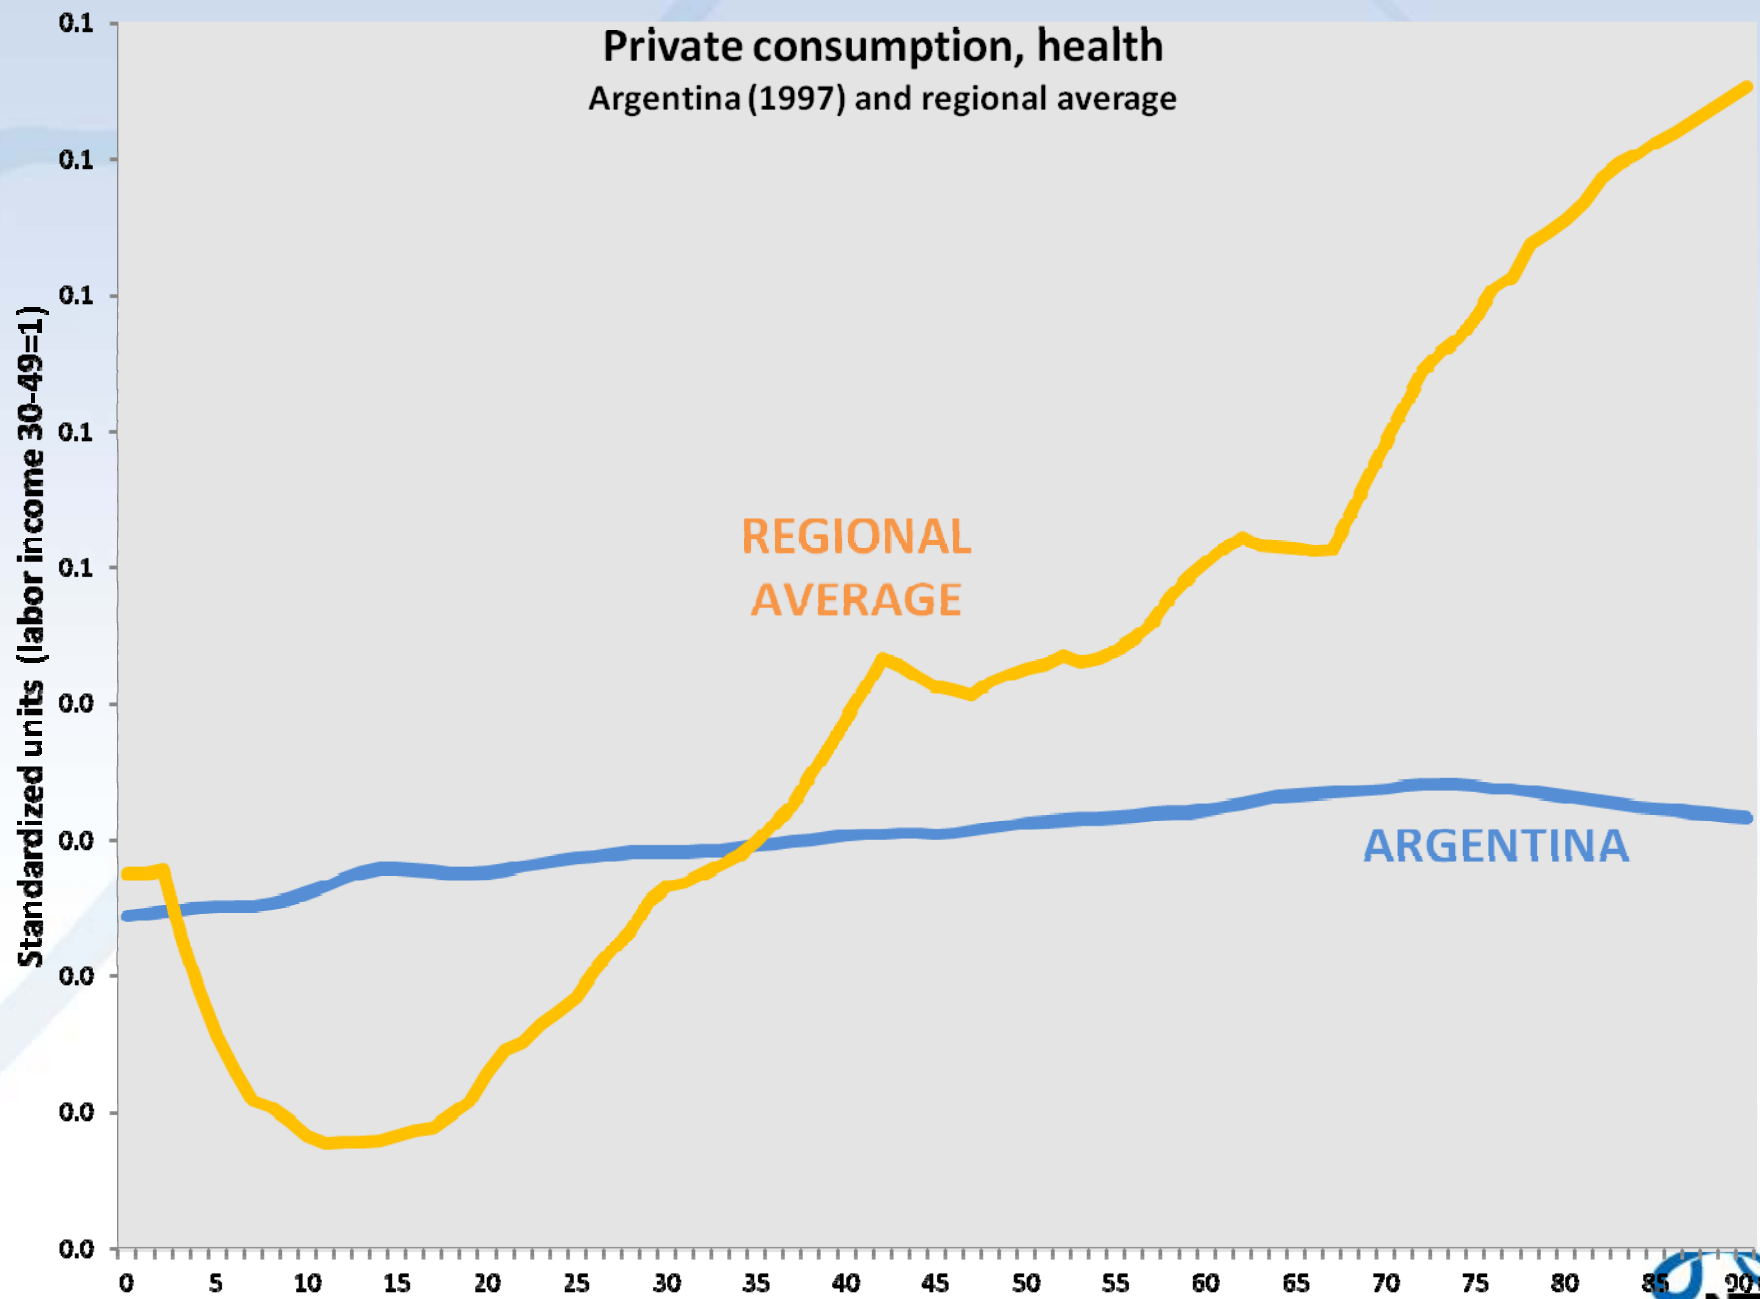

Public consumption, health Argentina (1997) and regional average

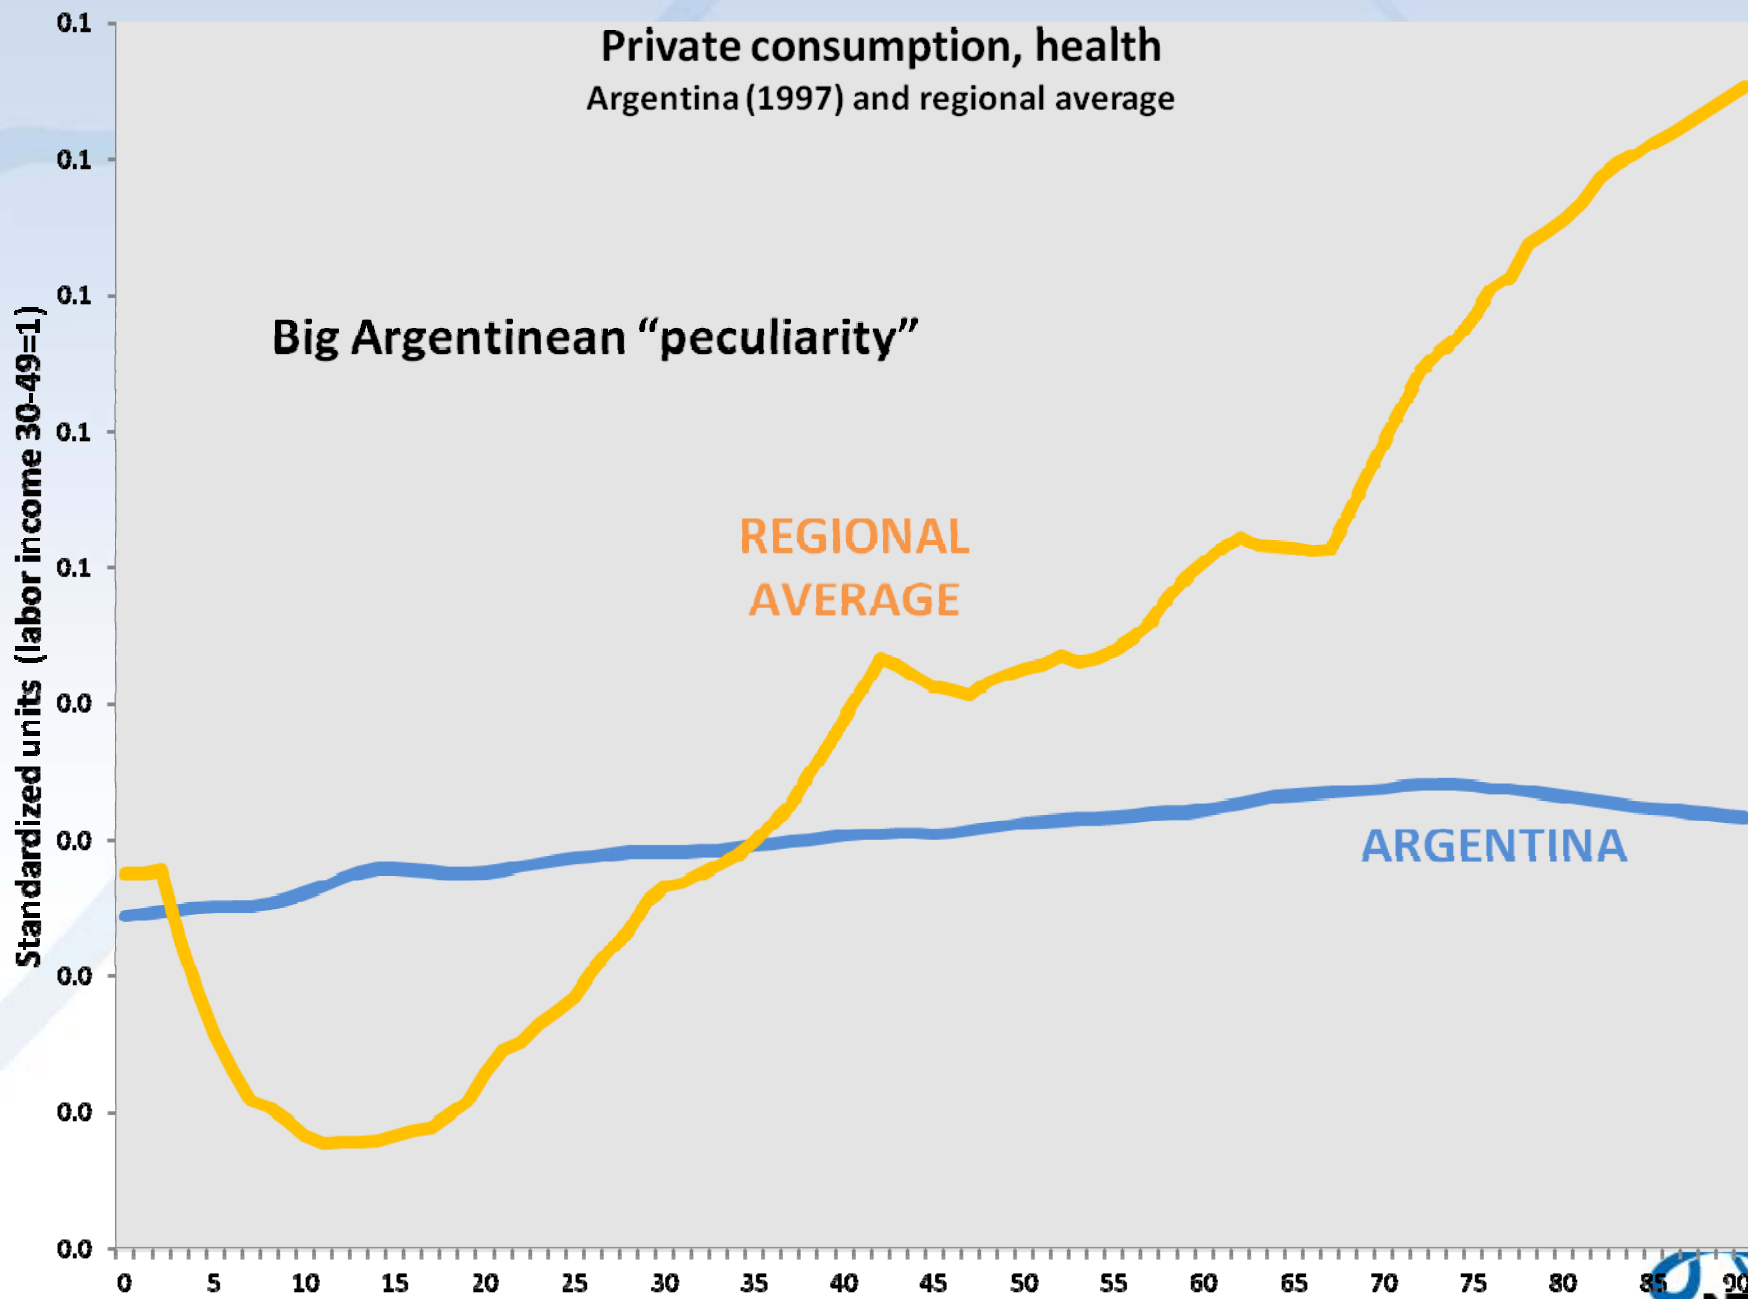

Private consumption, health

Argentina (1997) and regional average

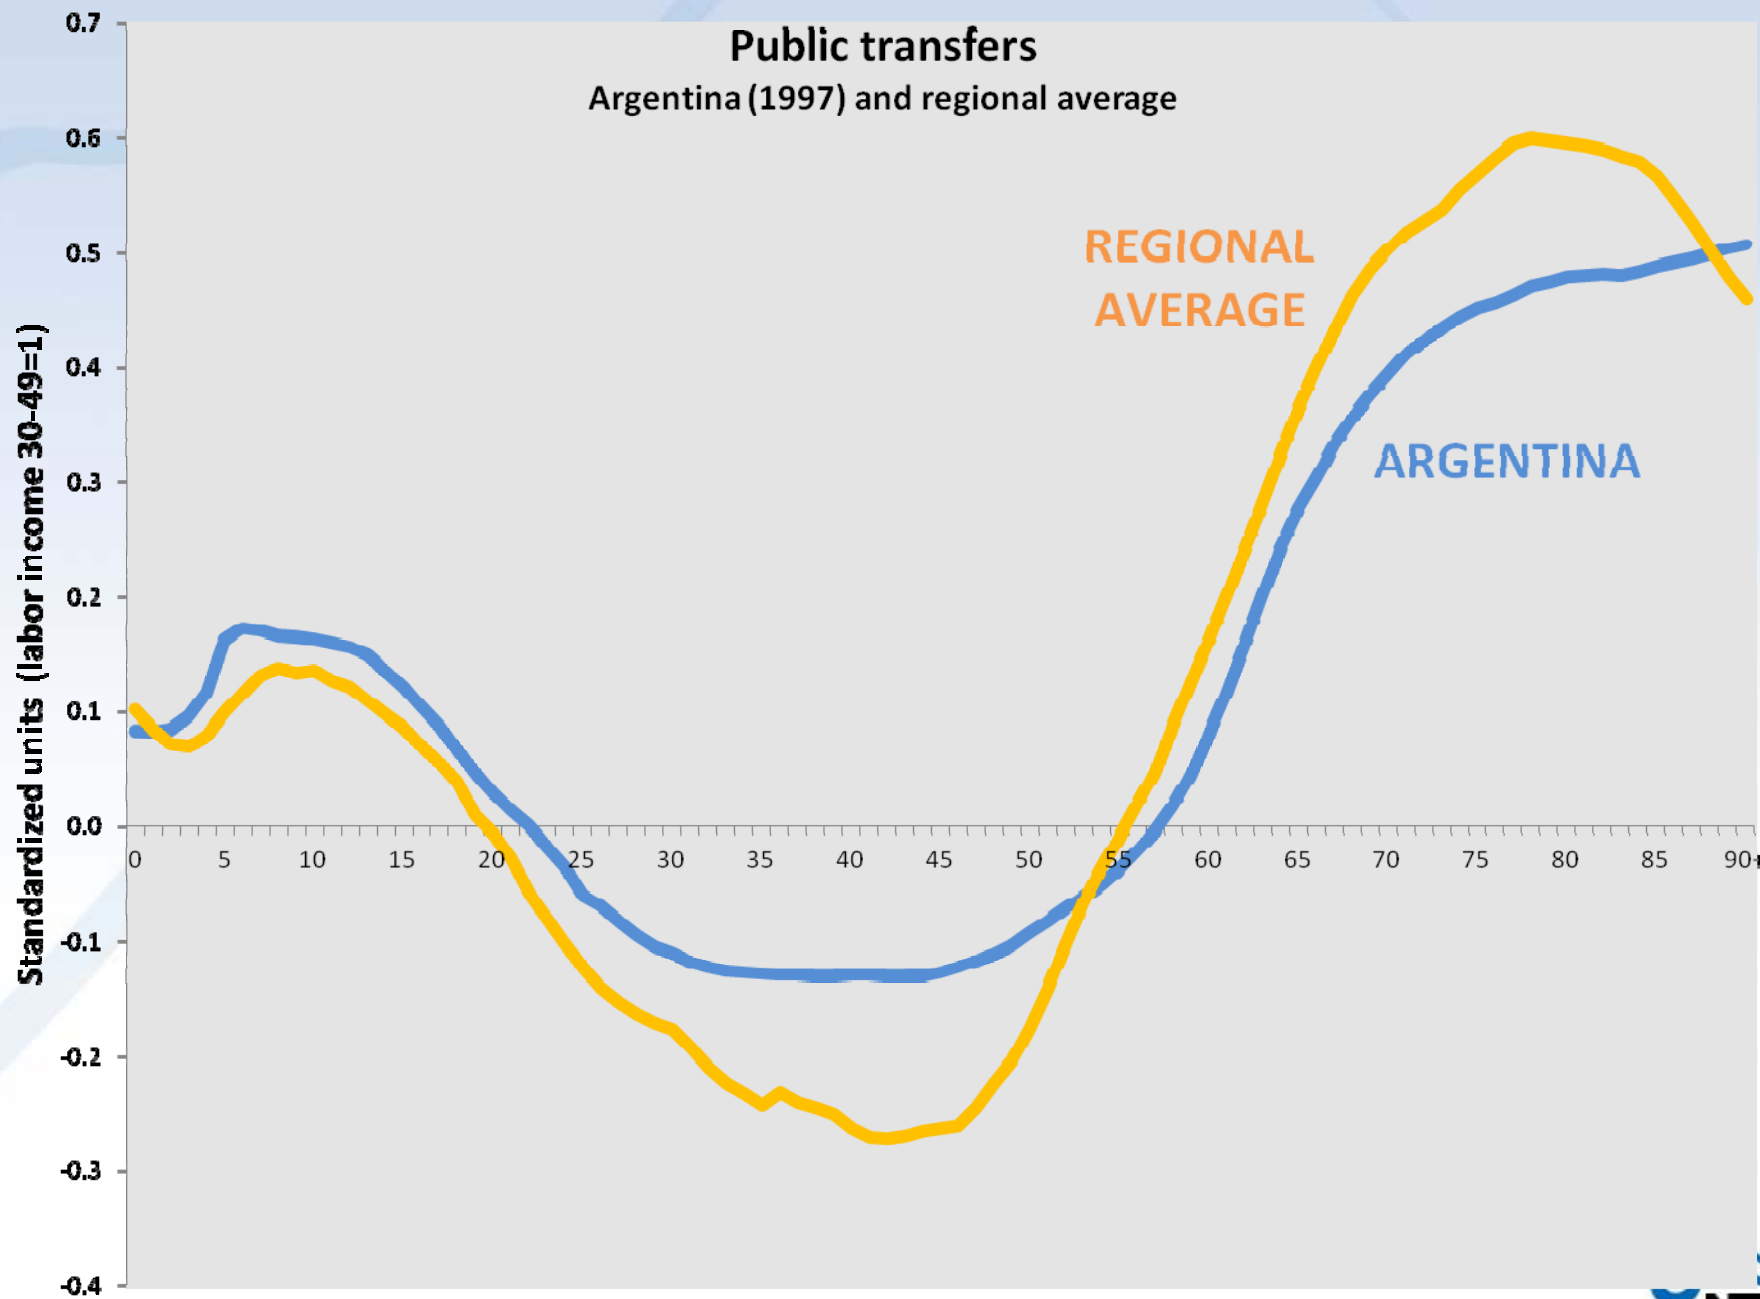

Private consumption, health Argentina (1997) and regional average

Big Argentinean "peculiarity"

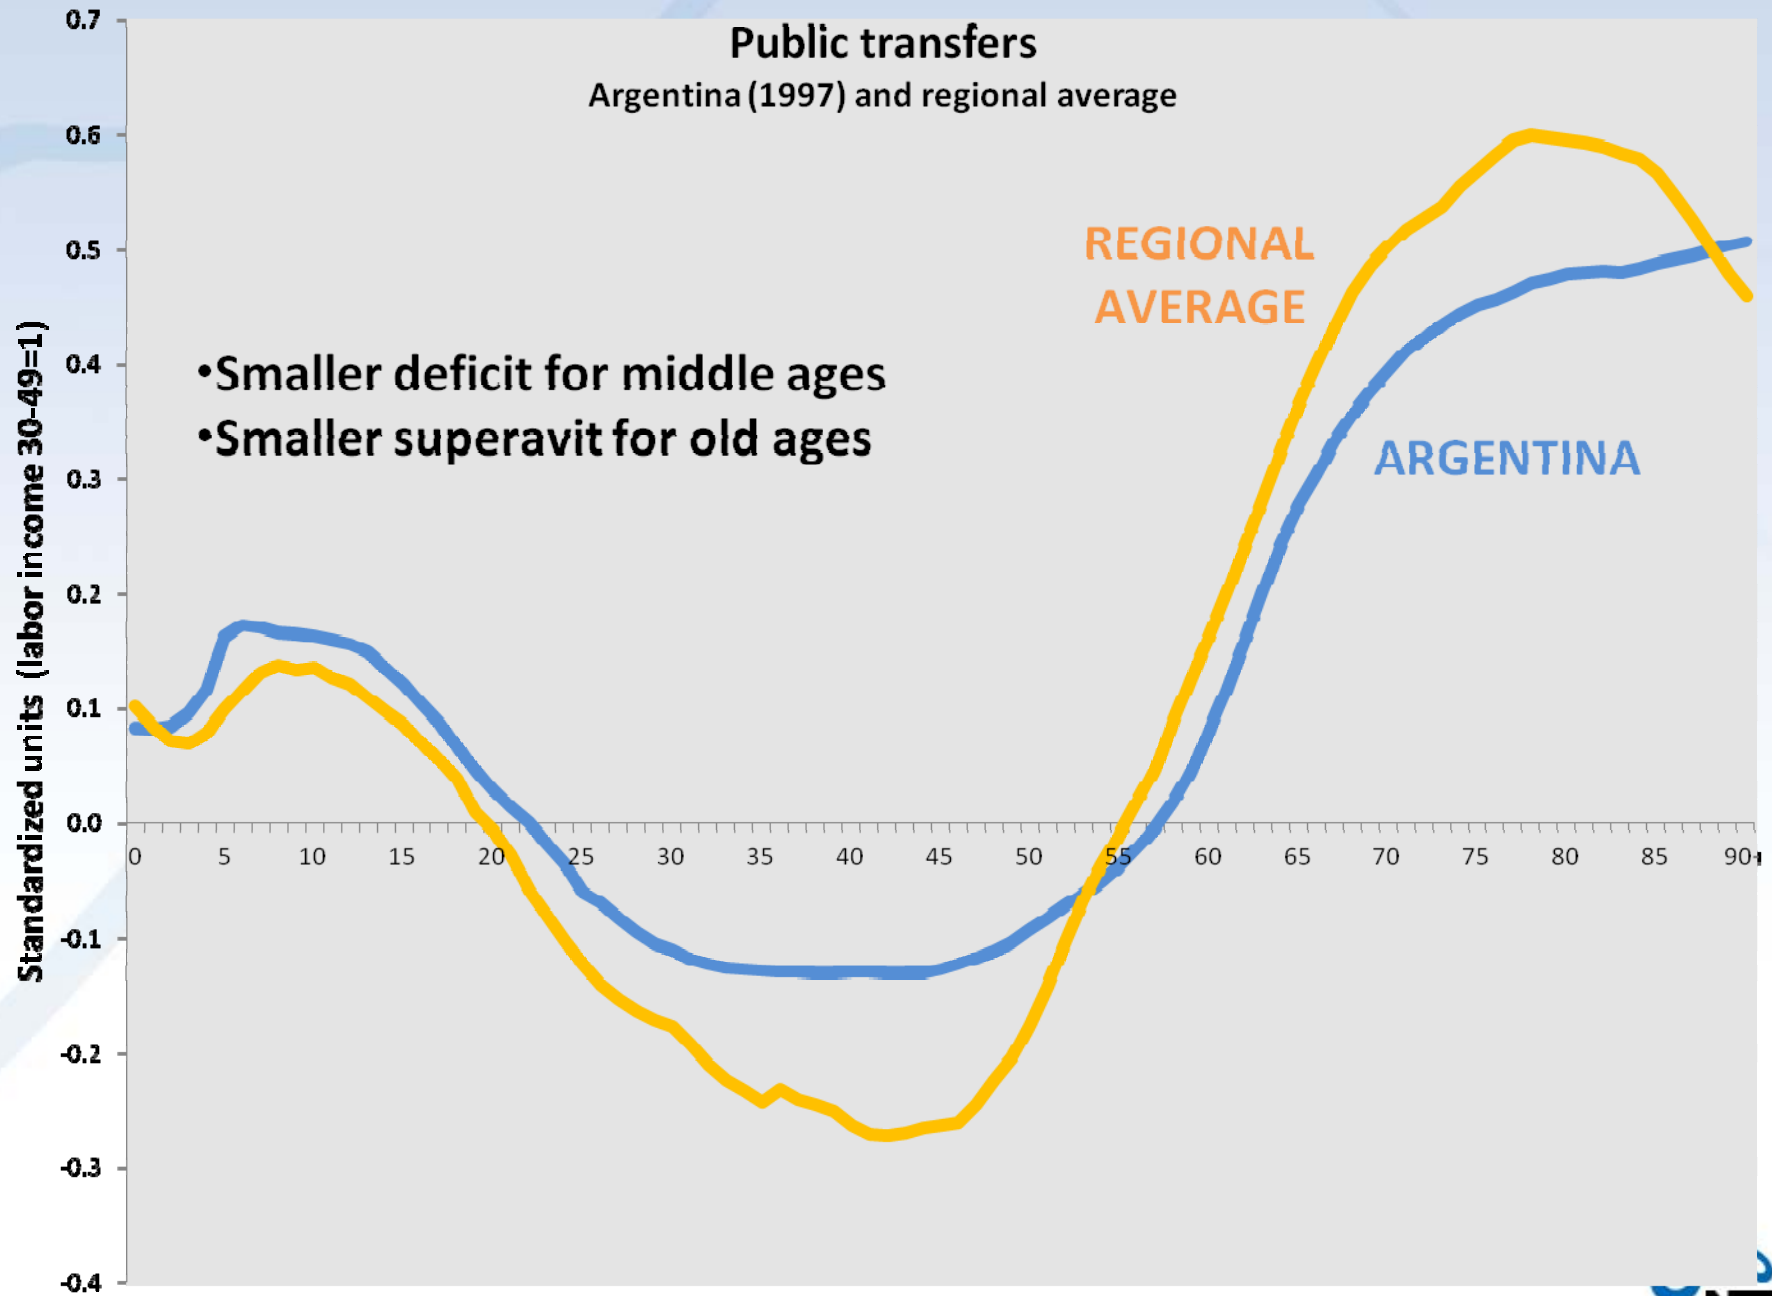

Public transfers

Argentina (1997) and regional average

Public transfers

Argentina (1997) and regional average

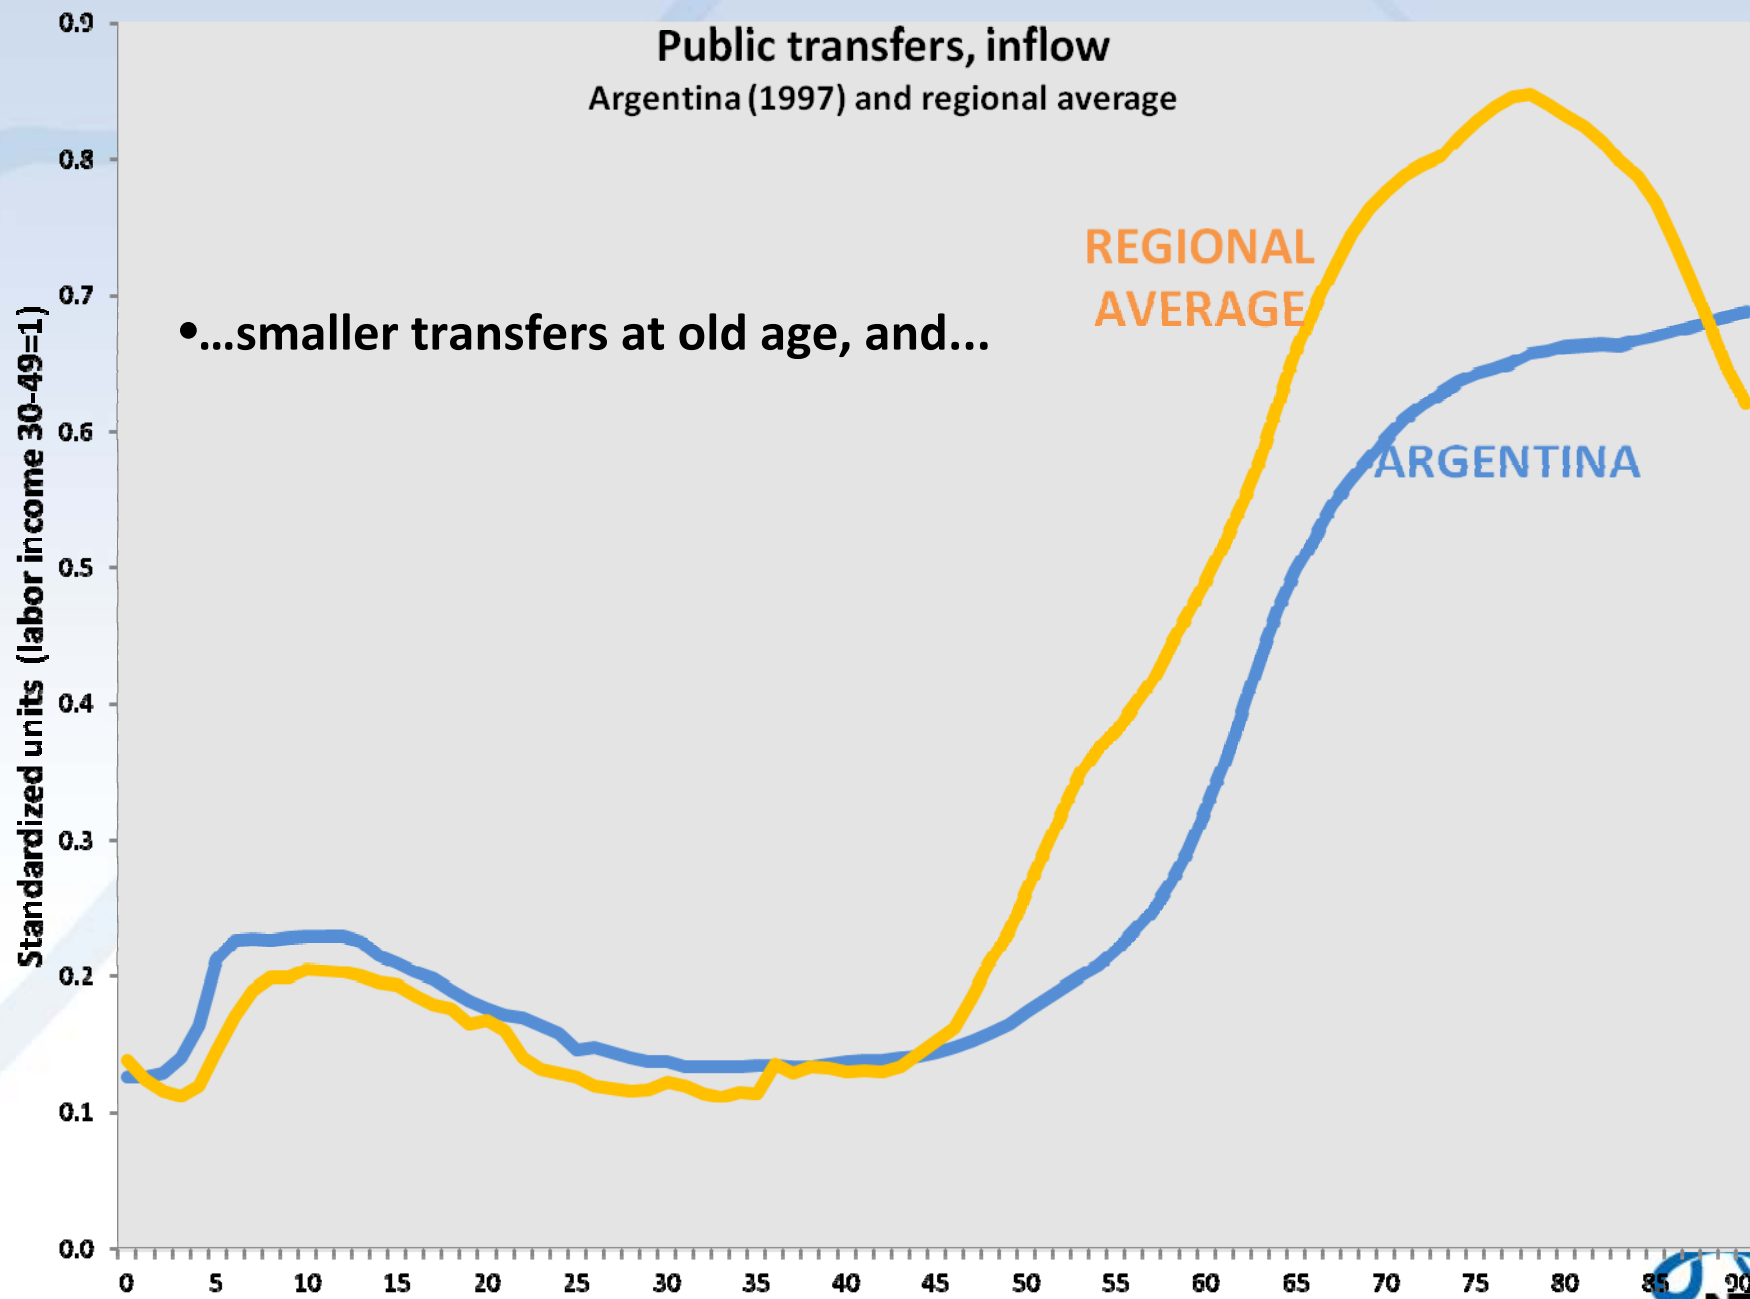

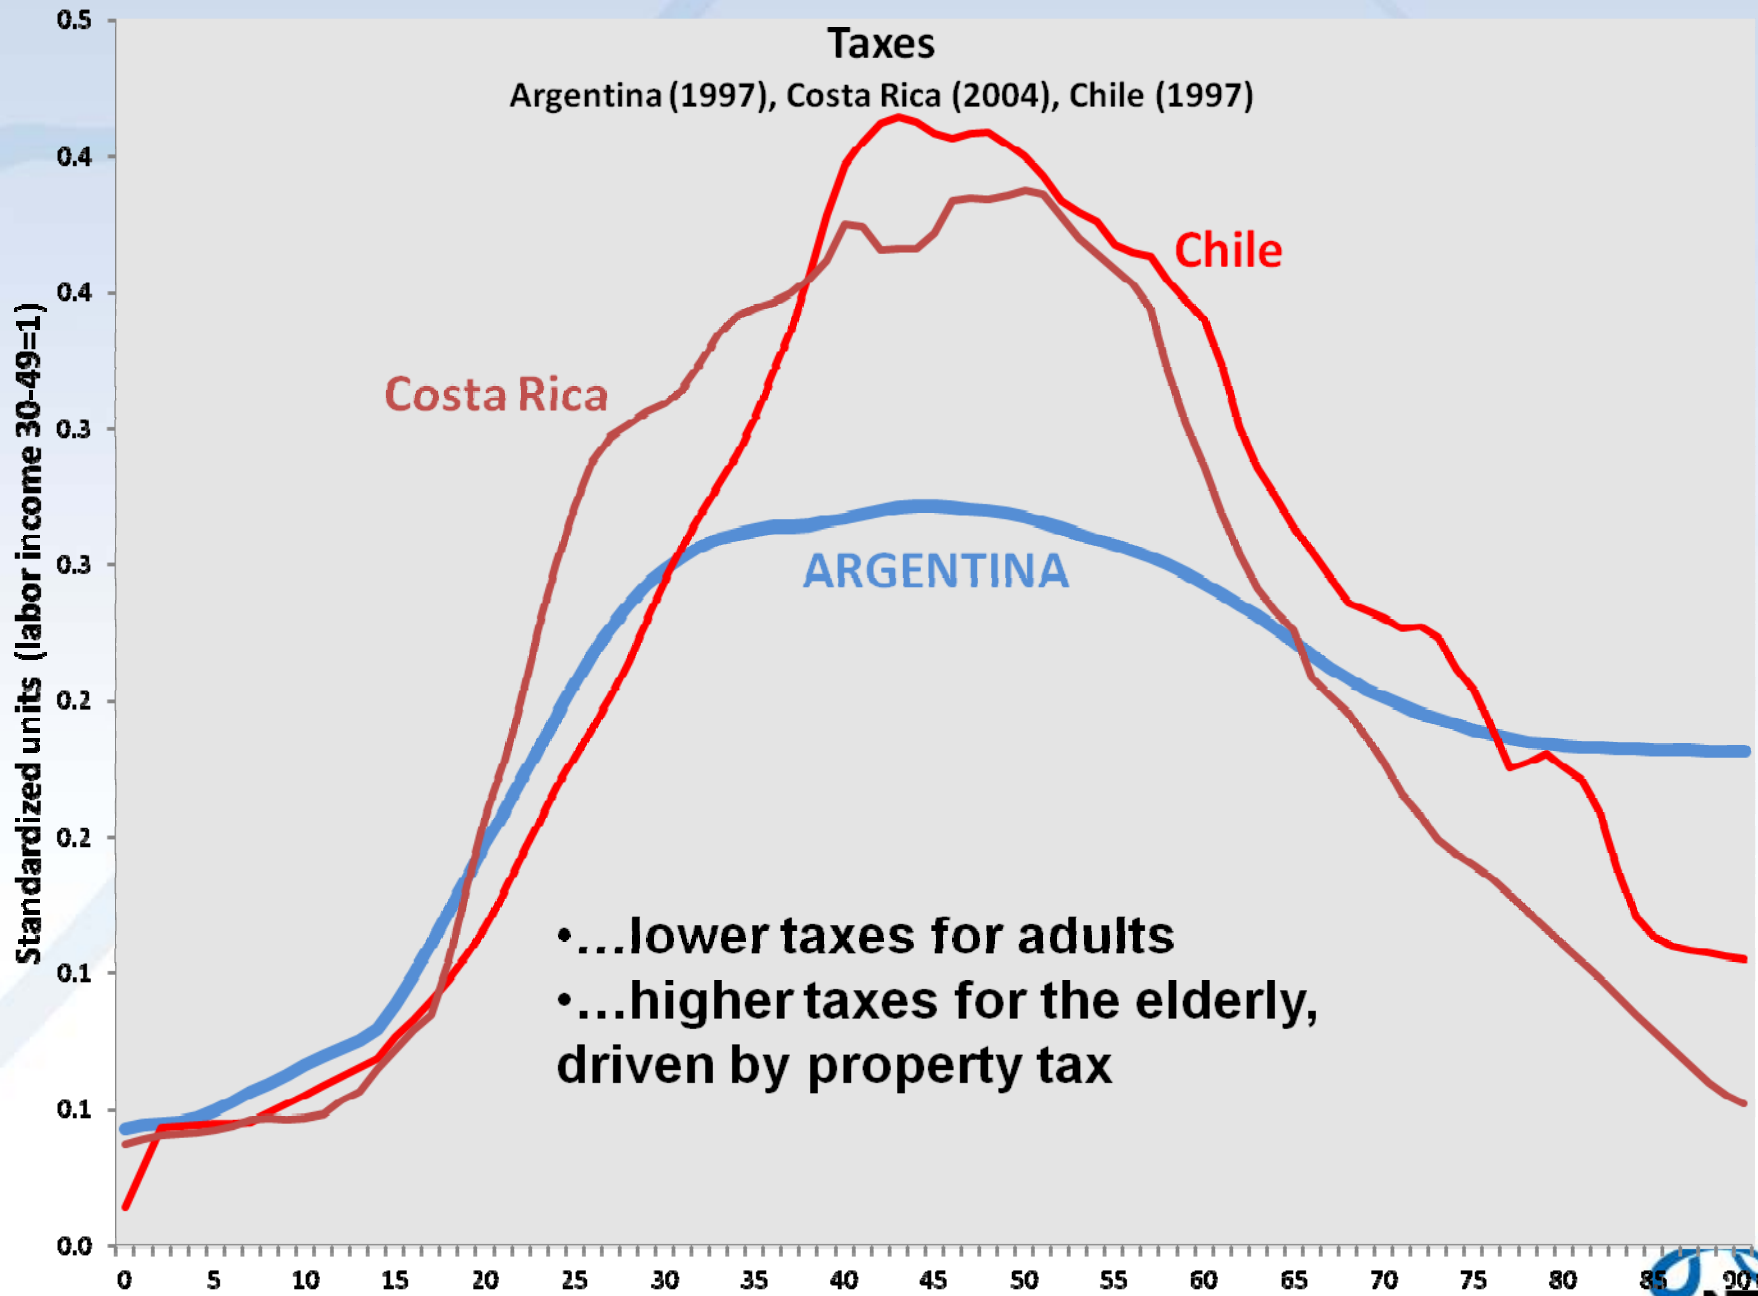

Public transfers

Argentina (1997) and regional average

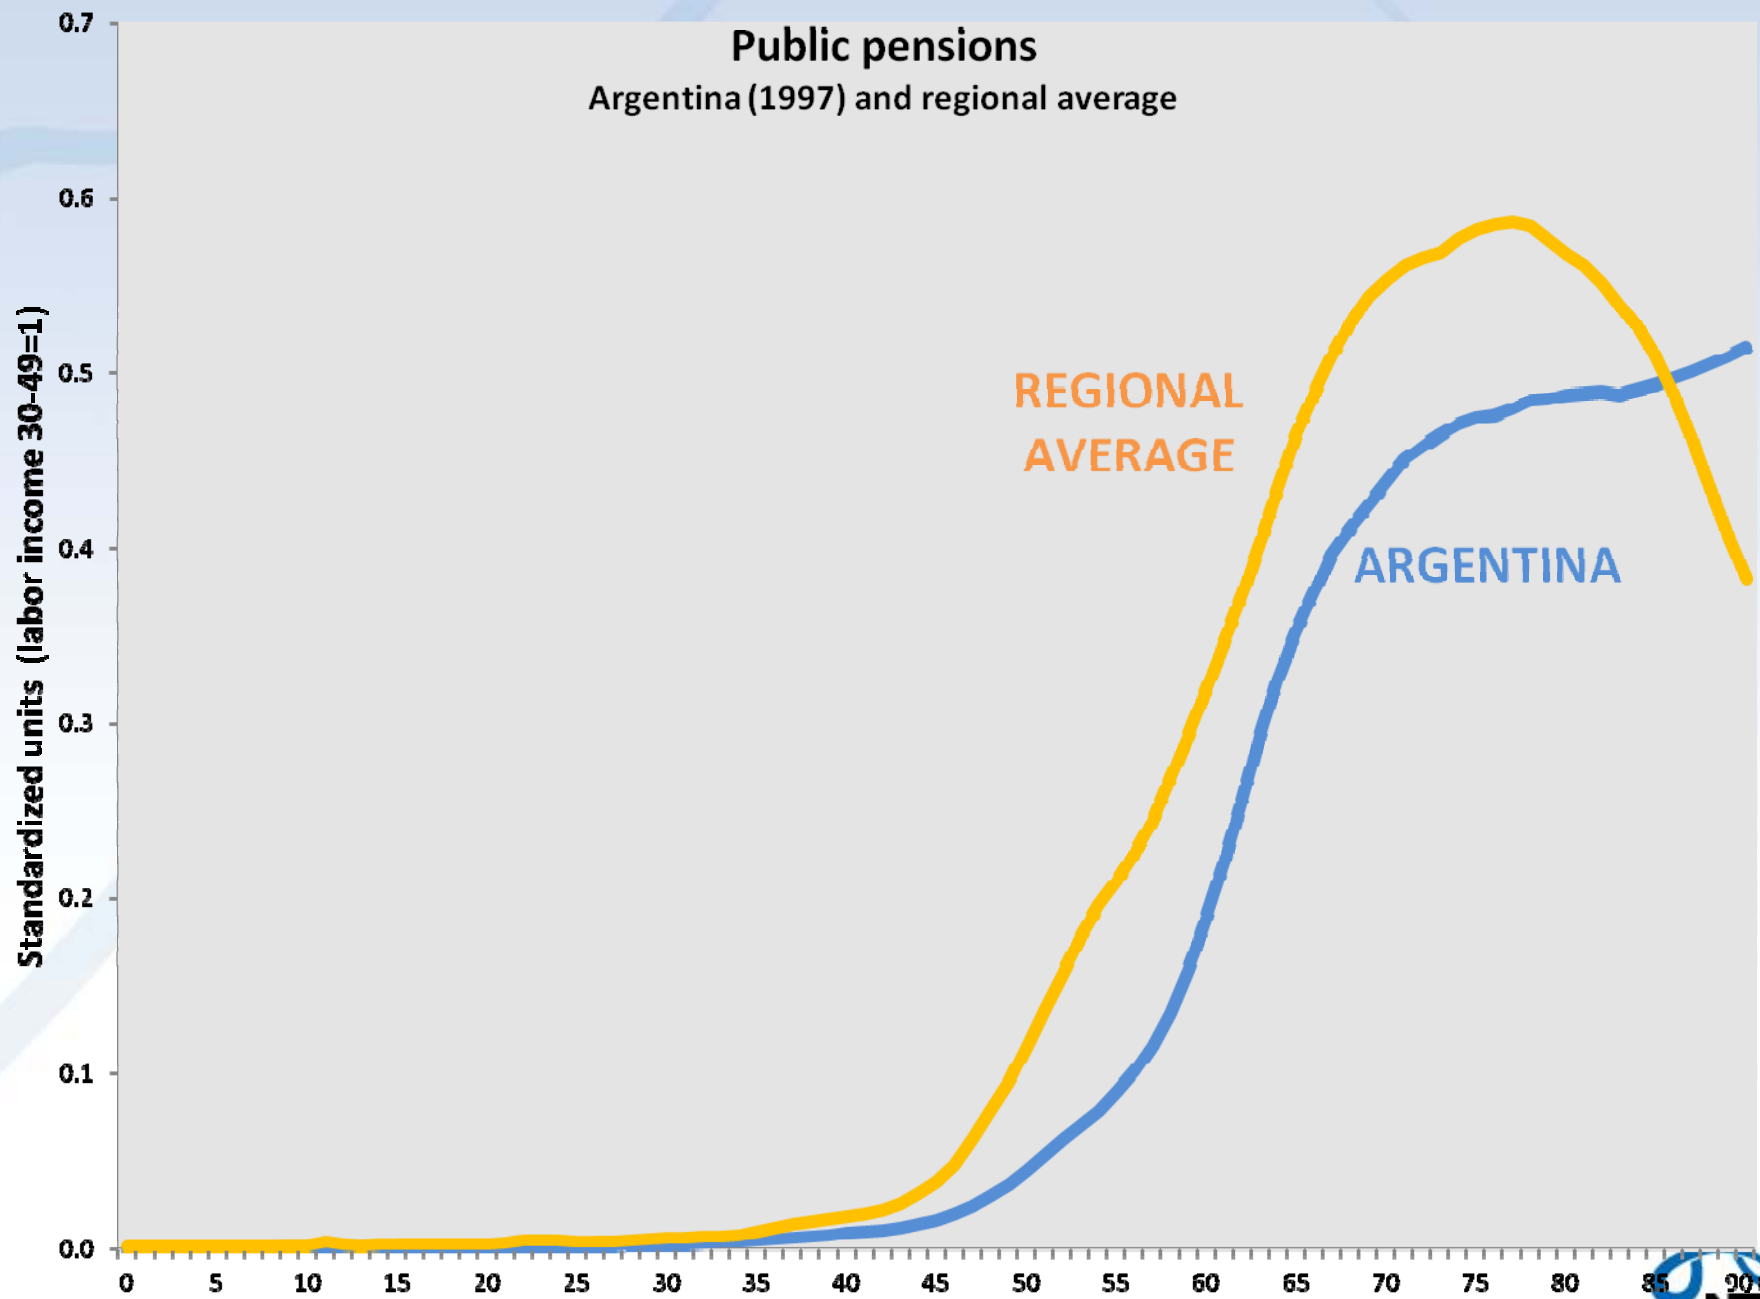

Public transfers, inflow Argentina (1997) and regional average

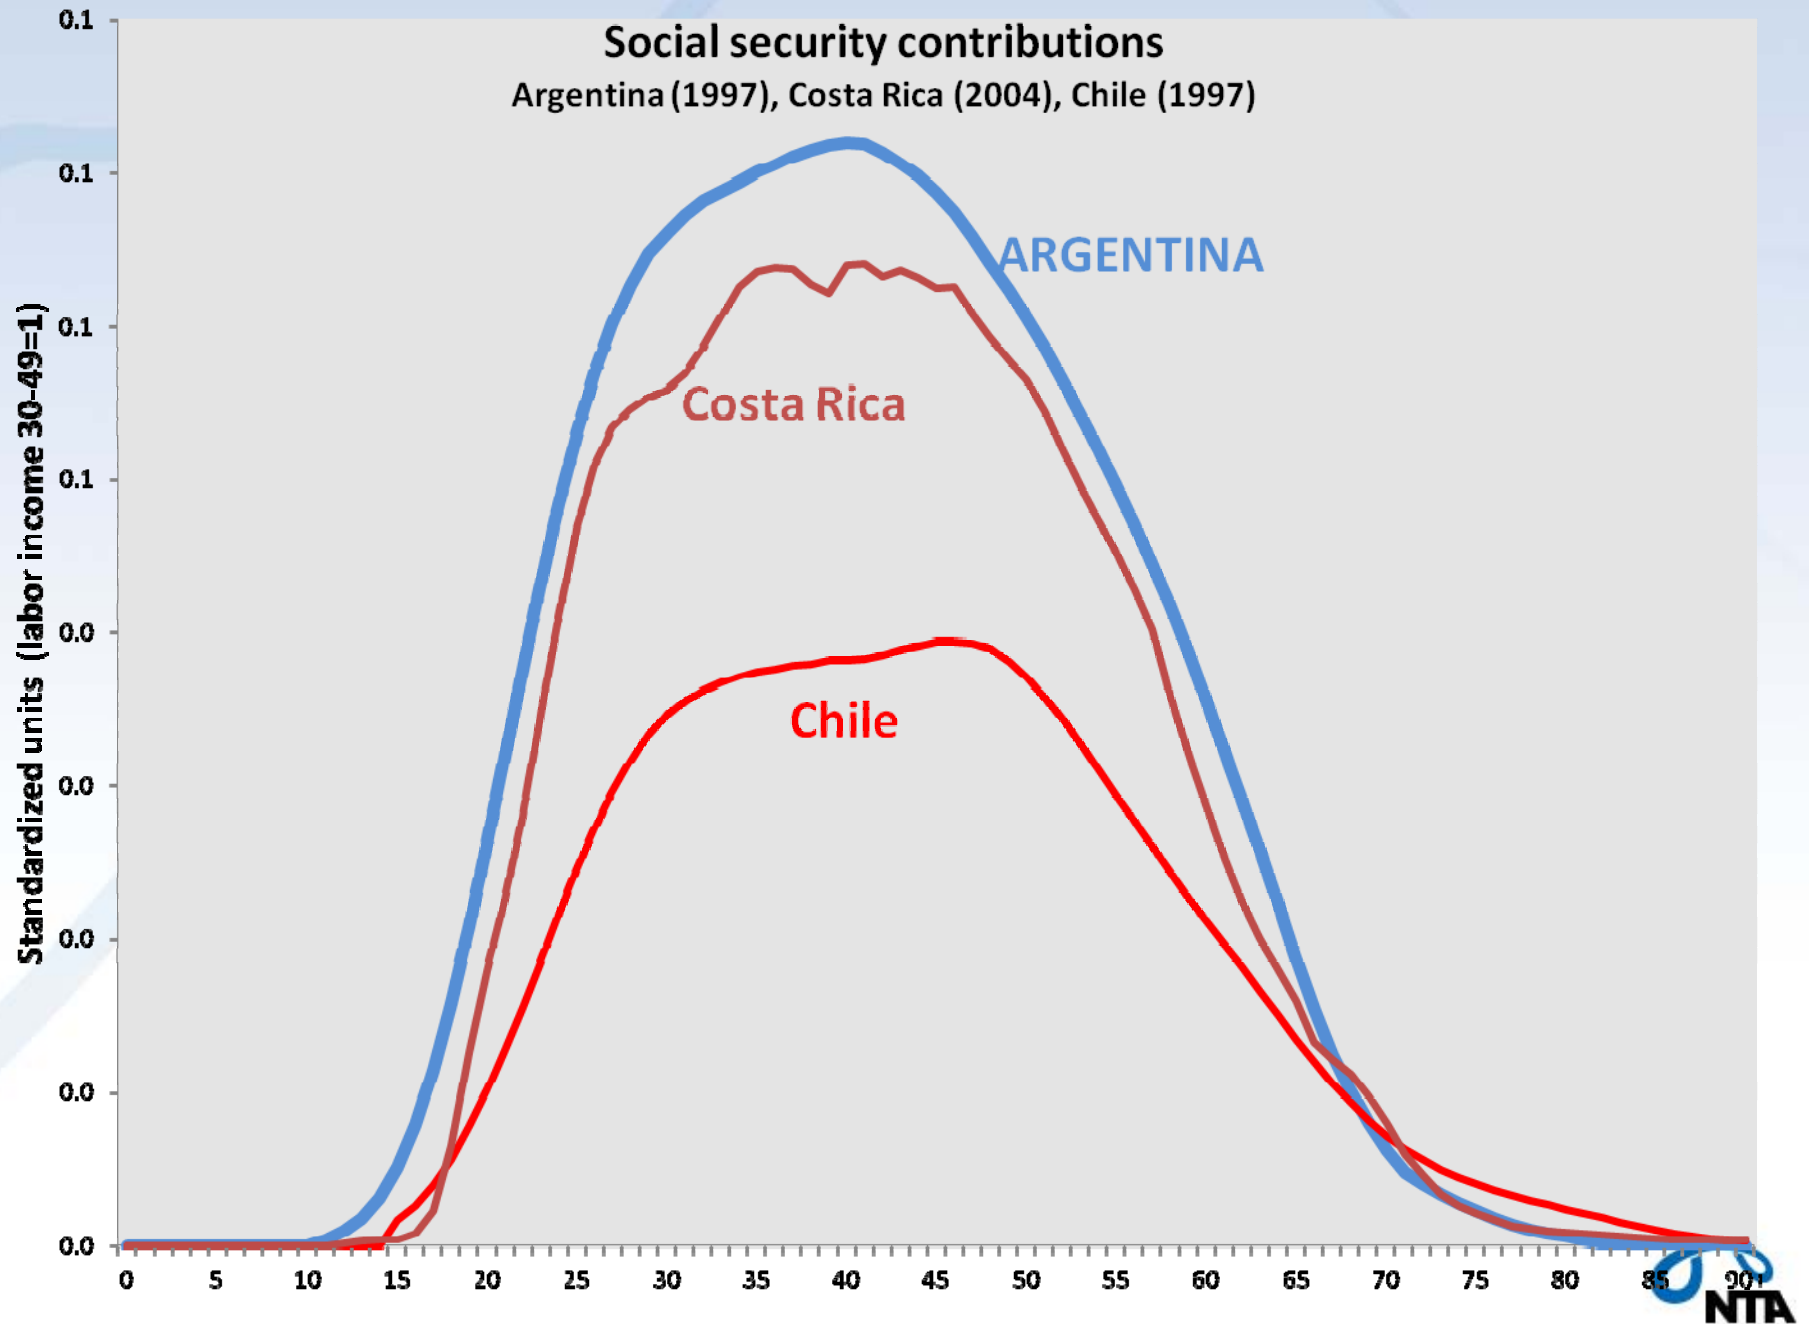

Public pensions

Argentina (1997) and regional average

Social security contributions

Argentina (1997), Costa Rica (2004), Chile (1997)

- No Argentinean “peculiarity”, except...
 - ...higher public consumption
 - ...lower and flatter private consumption
 - ...peculiar private health consumption
